Polyvinyl Alcohol: Materials, Processing and Applications

Description: For a number of years, plastic wastes have been accumulating at such a rate that there are now huge environmental concerns with their disposal. Options such as landfill and incineration have not been well received by the public, or indeed government legislation, and focus is now firmly upon the use of biodegradable alternatives for mass applications.

One material that has been considered for mass application has been polyvinyl alcohol (PVOH). To date, the use of this material has been confined to comparatively low technology applications such as paper coatings and fibre sizing, which rely upon its inherently poor resistance to moisture to initiate degradation and ultimate disposal.

Polyvinyl Alcohol: Materials, Processing and Applications Review Report provides a concise introduction to polyvinyl alcohol - the material itself, the processing and applications, and also potential future directions for PVOH.

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct and select the format(s) you require.

Product Name: Polyvinyl Alcohol: Materials, Processing and Applications
Web Address: http://www.researchandmarkets.com/reports/1055839/
Office Code: SCDK1SHQ

Product Formats
Please select the product formats and quantity you require:

<table>
<thead>
<tr>
<th>Quantity</th>
<th>Description</th>
</tr>
</thead>
<tbody>
