Comparative Veterinary Histology

Description: Organised by body-system, this highly illustrated volume covers the normal histological appearance of tissues in a wide range of animals, both domestic and exotic species, with relevant clinical correlates emphasising the need to appreciate the normal in order to recognise the abnormal.

The breadth of coverage - farm animals, dogs, cats, horses, birds, reptiles, amphibians and fish - and the integration of normal and abnormal tissue provide a reference of lasting value to veterinary students, veterinary practitioners and pathologists.

Contents:

1. Introduction
2. The cell
3. Connective tissue
4. Blood
5. Muscle
6. Cardiovascular system
