Clinical Immunology of the Dog and Cat, 2nd Edition

Description: The First Edition of this book (1999) was greeted by critical acclaim, became a bestseller and was translated into many languages. It proved useful for veterinarians in general practice who may have had limited exposure to the subject of immunology in training to help translate theory into clinical practice.

The book details the manifestations, diagnosis and treatment of immune-related disease in the dog and cat. It is illustrated throughout in full colour, to show and explain to the reader as clearly as possible the complicated principles of disease and immunodiagnostic tests, supported by clinical cases, gross and histopathology, cytology, haematology, immunohistochemistry and other immunological tests.

Since publication of the First Edition many advances have been made and the Second Edition incorporates these changes in focus and on techniques. There is an additional chapter on respiratory and cardiac disease, and given the continued focus of companion animal practitioners on vaccine-related issues, a new chapter is devoted entirely to the subject of vaccinology. The Second Edition includes approximately 200 new photographic images, an updated list of further reading and an extensive glossary of terms.

Key features:
- Brief explanation of basic science
- Focuses on clinical practice
- Revised and expanded second edition of a bestseller
- New chapters on respiratory and cardiac disease, and on vaccinology
- Superlative colour diagrams and colour photos

Revised and Updated for 2011

Due to the continued success of this book and the need for a second print-run, an opportunity arose in 2011 to further update the content of Clinical Immunology of the Dog and Cat. Key new developments since publication of this second edition in 2008 have been incorporated into the text of each chapter, some diagrams have been subtly modified and the list of further reading that accompanies each chapter has been significantly updated to highlight the very latest research developments from this rapidly changing field. In conjunction with these updates to content, the book now appears in soft cover to enhance accessibility to the target audience.

Contents:

Preface (First Edition)
Preface (Second Edition)
Contributors
Abbreviations
Key to Symbols

1. Basic Immunology
M. J. Day
Introduction
The immune system: an overview
Antigens
Antibodies (immunoglobulins)
Antigen–antibody interactions
Complement
Cells of the immune system
Tissues of the immune system
Lymphocyte recirculation
The major histocompatibility complex
Cytokines
T lymphocytes
B lymphocytes
Antigen presentation
T lymphocyte activation
B lymphocyte activation
Cytotoxicity
Immunoregulation
Immunological memory
Immunological tolerance
Age-related changes in the immune system
Further reading

2. Immunopathological Mechanisms
M. J. Day
Introduction
Type I hypersensitivity
Type II hypersensitivity
Type III hypersensitivity
Type IV hypersensitivity
Superantigens
Amyloidosis
Further reading

3. The Basis of Immune-Mediated Disease
M. J. Day
The spectrum and interrelationship of immune-mediated disease
Immunological mechanisms underlying allergic disease
Immunological mechanisms underlying autoimmune disease
Genetic defects underlying immunodeficiency disease
The induction of lymphoid neoplasia
Major histocompatibility complex and other genetic associations with immune-mediated disease
Further reading

4. Immune-Mediated Haematological Disease
M. J. Day and A. J. Mackin
Introduction
Immune-mediated haemolytic anaemia in the dog
Immune-mediated haemolytic anaemia in the cat
Immune-mediated thrombocytopenia in the dog
Immune-mediated thrombocytopenia in the cat
Cold agglutinin disease
Immune-mediated neutropenia in the dog
Feline blood group antigens
Canine blood group antigens
Blood transfusion reactions
Blood transfusion protocol
Neonatal isoerythrolysis
Further reading

5. Immune-Mediated Skin Disease
M. J. Day and S. E. Shaw
Introduction
Cutaneous disease caused by type I hypersensitivity
Contact hypersensitivity
Cutaneous vasculitis
Pemphigus and bullous pemphigoid
Cutaneous lupus erythematosus
Dermatomyositis
Dermatouveitis
Erythema multiforme and toxic epidermal necrolysis
Sebaceous adenitis
Alopecia areata
Pseudopelade
Canine granulomatous mural folliculitis
Plasma cell pododermatitis
Feline atrophic auricular polychondritis
Further reading

6. Immune-Mediated Musculoskeletal and Neurological Disease
M. J. Day and D. Bennett
Introduction
Immune-mediated polyarthritis
Myositis
Myasthenia gravis
Polyneuritis
Degenerative myelopathy of German Shepherd Dogs
Granulomatous meningoencephalitis
Necrotizing meningoencephalitis
Necrotizing leukoencephalitis
Greyhound meningoencephalitis
Polyarteritis nodosa
Steroid-responsive meningitis
Further reading

7. Immune-Mediated Alimentary Disease
M. J. Day and E. J. Hall
Gastrointestinal immunology
Immune-mediated gastrointestinal disease
Immune-mediated hepatic disease
Immune-mediated disease of the exocrine pancreas
Further reading

8. Immune-Mediated Respiratory and Cardiac Disease
M. J. Day and C. Clercx
The respiratory immune system
Immune-mediated respiratory disease
Immune-mediated cardiac disease
Further reading

9. Immune-Mediated Endocrine Disease
M. J. Day and S. E. Shaw
Introduction
Canine hypothyroidism
Feline hyperthyroidism
Lymphocytic parathyroiditis
Diabetes mellitus
Hypoadrenocorticism
Polyendocrine disease
Further reading

10. Immune-Mediated Urinary and Reproductive Disease
M. J. Day and A. J. Mackin
Introduction
Immune complex glomerulonephritis
Glomerular basement membrane autoimmunity
Chronic interstitial nephritis
Reproductive immunology
Further reading

11. Immune-Mediated Ocular Disease
M. J. Day and S. M. Crispin
Ocular immunity
Immune-mediated conjunctival disease
Immune-mediated diseases of the cornea
Immune-mediated diseases of the uvea
Immune-mediated diseases of the canine retina
Immune-mediated diseases of the canine sclera and episclera
Further reading
12. Immunodeficiency Disease
M. J. Day
Introduction
Secondary immunodeficiency
Primary immunodeficiency
Therapy for immunodeficiency disease
Further reading

13. Immune System Neoplasia
M. J. Day and J. M. Dobson
Introduction
Lymphoma
Lymphomatoid granulomatosis
Lymphoid leukaemia
Multiple myeloma
Waldenström's macroglobulinemia
Plasmacytoma
Myeloproliferative disease
Histiocytoma
Cutaneous and systemic histiocytosis
Histiocytic sarcoma
Mast cell tumour
Systemic mastocytosis
Further reading

14. Multisystem and Intercurrent Immune-Mediated Disease
M. J. Day
Introduction
Systemic lupus erythematosus
Autoimmunity and lymphoma
Myasthenia gravis and thymoma
IgA deficiency, hypersensitivity and autoimmunity
Further reading

15. Diseases of Lymphoid Tissue
M. J. Day
Introduction
Diseases of the thymus
Lymph node diseases
Diseases of lymphatic vessels
Diseases of the tonsil
Diseases of the spleen
Further reading

16. Immunotherapy
M. J. Day
Introduction
Immunomodulatory drugs
Monoclonal antibodies in immunotherapy
Antigen-specific immunotherapy
Gene therapy
Transplantation and stem cell therapy
Further reading

17. Vaccination
M. J. Day
Introduction
The aim of vaccination
Basic requirements of a vaccine
Types of vaccine
Vaccines of the future
Duration of immunity
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct and select the format(s) you require.

Product Name: Clinical Immunology of the Dog and Cat, 2nd Edition
