An Atlas of Radiology of the Traumatized Dog and Cat, 2nd Edition

Description: The totally revised second edition of this comprehensive Atlas describes and explains the uses of diagnostic radiology and provides detailed instructions on how best to apply this technique to the diagnosis of traumatized dogs and cats, including a range of emergency cases. The main focus of the revised concept is the descriptive presentation of clinical cases.

The book consists of three main chapters: thoracic, abdominal and musculoskeletal trauma, including emergency cases. Four smaller chapters cover soft tissue injury, gunshot wounds, cases of abuse and poisoning. The first part of each chapter reviews the basics of the particular radiological techniques necessary for that section, radiographic characteristics, indications for examination, and diagnoses. The introduction is followed by numerous illustrated case studies. Each case is discussed in detail relative to the clinical history, the findings on examination, radiographic procedures, a description of the radiographic features/patterns determined on evaluation of the radiographs, a specific or differential diagnosis, and the treatment or management received by the patient. Follow-up-radiographic studies demonstrate the healing process in selected cases.

Veterinary practitioners will find ample material in the Atlas which will help to reinforce or improve their clinical or technical skills.

Key features:
- The authors are leading specialists in radiology of small animals
- Includes high quality radiographs
- Includes descriptive case studies and follow up studies

Contents:
1. General Introduction
2. Radiology of the Thoracic Trauma
3. Radiology of the Abdominal Trauma
4. Radiology of Musculoskeletal Trauma
5. Radiology of Soft Tissue Injury
6. Radiology of Gunshot Wounds
7. Radiology of Abused Patients
