Global IaaS Market 2015-2019

Description: About IaaS

IaaS is one of the fastest growing service models of cloud computing. The other two models are platform as a service (PaaS) and software as a service (SaaS). In IaaS, an organization outsources the equipment used to support operations, storage, hardware, servers, and networking components. The service providers own the equipment and also take care of maintenance. Clients use the services on a pay-per-use basis. Provision processing, storage, networks, and other fundamental computing resources are provided where consumers are allowed to run discrete software. Consumers have control over the operating systems, applications, and networking components.

The analysts forecast the Global IaaS market to grow at a CAGR of 42.91 percent over the period 2014-2019.

Covered in this Report
This report covers the present scenario and the growth prospects of the Global IaaS market for the period 2015-2019. To calculate the market size, the report considers the revenue generated from IaaS software, tools, applications, services, support, and maintenance.
