Clinical Endocrinology of Dogs and Cats: An Illustrated Text, 2nd edition

Description: This highly illustrated textbook is aimed at the veterinarian in practice or training interested in all types of endocrine diseases of dogs and cats. The book is organised by body system and is case oriented.

Chapters deal with separate endocrine glands, beginning with a brief review of the morphology and physiology of the gland, complete with drawings depicting the functional principles. This is followed by descriptions of the disorders of the gland with up-to-date information on diagnosis and treatment.

Numerous clinical cases illustrate the presenting symptoms and the results following treatment. The final chapters contain diagnostic and therapeutic protocols, as well as algorithms for problems such as alopecia, polyuria, and weight loss.

Key features
- For use in clinical practice
- Fully illustrated throughout
- Principles explained by use of drawings and diagrams
- Contains detailed protocols and algorithms for diagnosis and treatment

Preface to the first edition
Preface to the second edition

Clinical Endocrinology

1 Introduction
1.1 Hormones
1.1.1 Chemical nature of hormones
1.1.2 Storage, release, and transport
1.1.3 Action, metabolism, and elimination
1.2 Genes encoding hormones
1.2.1 DNA regions
1.2.2 Protein factors
1.2.3 RNA processing
1.2.4 Translation
1.2.5 Posttranslational processing
1.3 Endocrine disorders
1.4 Clinical assessment
1.4.1 History and physical examination
1.4.2 Laboratory testing
1.4.3 Diagnostic imaging

2 Hypothalamus-Pituitary System
2.1 Introduction
2.2 Anterior lobe
2.2.1 Somatotropin and lactotropin
2.2.1.1 Pituitary growth hormone
2.2.1.2 Mammary growth hormone
2.2.1.3 Prolactin
2.2.2 Congenital growth hormone deficiency
2.2.3 Acquired growth hormone deficiency
2.2.4 Growth hormone excess
2.2.4.1 Excessive pituitary growth hormone
2.2.4.2 Excessive mammary growth hormone
2.2.5 Prolactin and pseudopregnancy in the dog
2.2.6 Pituitary tumors
2.2.6.1 Hormone deficiency
2.2.6.2 Mass effects
2.3 Posterior lobe
2.3.1 Oxytocin
2.3.2 Vasopressin
2.3.3 Diabetes insipidus
2.3.3.1 Central diabetes insipidus
2.3.3.2 Nephrogenic diabetes insipidus
2.3.3.3 Primary polydipsia
2.3.3.4 Algorithm for polyuria / polydipsia
2.3.4 Vasopressin excess; Syndrome of inappropriate antidiuresis (SIAD)

3 Thyroids
3.1 Introduction
3.1.1 Hormone synthesis and secretion
3.1.2 Hormone transport, tissue delivery, and metabolism
3.1.3 Regulation of thyroid function
3.1.4 Thyroid hormone action
3.2 Hypothyroidism in young animals
3.2.1 Acquired juvenile hypothyroidism
3.2.2 Thyroid dysgenesis
3.2.3 Defective thyroid hormone synthesis
3.2.4 Central hypothyroidism
3.3 Hypothyroidism in adult animals
3.3.1 Primary hypothyroidism
3.3.2 Central hypothyroidism
3.4 Hyperthyroidism and thyroid tumors
3.4.1 Hyperthyroidism in cats
3.4.2 Thyroid tumors and hyperthyroidism in dogs

4 Adrenals
4.1 Introduction
4.1.1 Synthesis and secretion of corticosteroids
4.1.2 Transport and metabolism
4.1.3 Regulation of glucocorticoid secretion
4.1.4 Regulation of mineralocorticoid secretion
4.1.5 Glucocorticoid action
4.1.6 Mineralocorticoid action
4.1.7 Adrenal androgens
4.2 Adrenocortical insufficiency
4.2.1 Primary adrenocortical insufficiency
4.2.2 Secondary adrenocortical insufficiency
4.2.3 Relative adrenocortical insufficiency
4.3 Glucocorticoid excess
4.3.1. Pituitary-dependent hypercortisolism
4.3.2. Hypercortisolism due to adrenocortical tumor
4.3.3. Hypersecretion of sex hormones by adrenocortical tumor
4.3.4 Ectopic ACTH syndrome
4.3.5 Food-dependent glucocorticoid excess
4.3.6 Iatrogenic hypercorticism and iatrogenic secondary hypoadrenocorticism
4.3.6.1 Glucocorticoids as pharmacological agents
4.3.6.2 Iatrogenic hypercorticism
4.3.6.3 Iatrogenic secondary hypoadrenocorticism
4.3.6.4 Withdrawal from glucocorticoids
4.3.6.5 Alternate-day glucocorticoid therapy
4.4 Mineralocorticoid excess
4.4.1 Primary mineralocorticoid excess
4.5 Adrenal medulla
4.5.1 Introduction
4.5.2 Pheochromocytoma
5 Endocrine Pancreas
5.1 Introduction
5.1.1 The endocrine pancreas
5.1.2 Insulin synthesis and structure
5.1.3 Regulation of insulin secretion
5.1.4 Actions of insulin
5.2 Diabetes mellitus
5.2.1 Classification
5.2.2 Metabolic disturbances
5.2.3 Diabetes mellitus in dogs
5.2.4 Diabetes mellitus in cats
5.2.5 Problems associated with the regulation of diabetes in dogs and cats
5.2.6 Diabetic ketoacidosis (DKA) and hyperglycemic hyperosmolar state (HHS)
5.3 The hypoglycemic syndrome
5.3.1 Insulinoma
5.3.2 Nonpancreatic tumors associated with hypoglycemia
5.3.3 Juvenile hypoglycemia
5.4 Other endocrine tumors associated with the pancreas
5.4.1 Gastrinoma
5.4.2 Glucagonoma

6 Gonadal Development and Disorders of Sexual Differentiation
6.1 Introduction
6.1.1 Establishment of the chromosomal sex
6.1.2 Establishment of the gonadal sex
6.1.2.1 Genes essential for gonadal development
6.1.3 Development of the Wolffian and Müllerian ducts
6.1.3.1 Genes essential for development of Wolffian and Müllerian ducts
6.1.4 Establishment of the phenotypic sex
6.2 Abnormal sexual differentiation
6.2.1 Disorders of chromosomal sex
6.2.1.1 Chimerism and mosaicism of sex chromosome
6.2.1.2 XO syndrome (gonadal dysgenesis)
6.2.1.3 XXY syndrome
6.2.1.4 XXX syndrome (X trisomy, triple X syndrome)
6.2.2 Disorders of gonadal sex
6.2.2.1 XY sex reversal syndrome (XY SRS)
6.2.2.2 XX sex reversal syndrome (XX SRS)
6.2.3 Disorders of phenotypic sex
6.2.3.1 Female pseudohermaphroditism (pseudohermaphroditismus femininus)
6.2.3.2 Male pseudohermaphroditism (pseudohermaphroditismus masculinus)

7 Ovaries
7.1 Introduction
7.2 Estrous cycle, anestrus, pregnancy, and parturition
7.2.1 Estrous cycle, anestrus, pregnancy, and parturition in the dog
7.2.1.1 Estrous cycle
7.2.1.2 Follicular phase
7.2.1.3 Preovulatory luteinization and ovulation
7.2.1.4 Luteal phase
7.2.1.5 Anestrus
7.2.1.6 Pregnancy and parturition
7.2.2 Estrous cycle, anestrus, pregnancy, and parturition in the cat
7.2.2.1 Estrous cycle and anestrus
7.2.2.2 Pregnancy and parturition
7.3 Medical pregnancy termination
7.4 Induction of parturition
7.5 Persistent estrus
7.6 Split heat
7.7 Hypoluteoidism
7.8 Prolonged anestrus
7.9 Estrus induction
7.10 Estrus prevention
7.11 Cystic endometrial hyperplasia and endometritis
7.12 Fertility disorders in the bitch due to breeding management problems

8 Testes
8.1 Introduction
8.1.1 Hormone synthesis and secretion
8.1.2 Regulation of testis function
8.2 Hypogonadism
8.3 Cryptorchidism
8.4 Testicular neoplasia
8.5 Male infertility

9 Calcitropic Hormones
9.1 Introduction
9.1.1 Parathyroid hormone
9.1.1.1 Development of the parathyroid glands
9.1.1.2 PTH synthesis and secretion
9.1.1.3 Regulation of PTH secretion
9.1.1.4 PTH action
9.1.2 Vitamin D
9.1.2.1 Vitamin D sources and synthesis
9.1.2.2 Vitamin D metabolism
9.1.2.3 Regulation of vitamin D metabolites
9.1.2.4 Vitamin D action
9.1.3 Calcitonin
9.1.3.1 CT synthesis and action
9.1.4 Calcitropic hormones and bone metabolism
9.2 Hypoparathyroidism
9.3 Hyperparathyroidism
9.3.1 Primary hyperparathyroidism
9.3.2 Renal secondary hyperparathyroidism
9.3.3 Nutritional secondary hyperparathyroidism
9.4 Hypercalcemia of malignancy
9.5 Vitamin D-related disorders
9.5.1 Hypovitaminosis D
9.5.2 Hypervitaminosis D and vitamin D intoxication
9.6 Calcitonin-related disorders
9.6.1 Nutritional secondary hypercalcitonism
9.6.1.1 Decreased osteoclasia
9.6.1.2 Osteochondrosis
9.7 Miscellaneous
9.8 Puerperal tetany

10 Tissue Hormones and Humoral Manifestations of Cancer
10.1 Introduction
10.2 Natriuretic peptides
10.3 Erythropoietin
10.4 Humoral manifestations of cancer

11 Obesity
11.1 Introduction
11.2 Pathophysiology
11.2.1 Appetite regulation
11.2.2 Hormonal and metabolic changes

Protocols and Algorithms

12 Protocols for Function Tests
12.1 Pituitary anterior lobe
12.1.1 CRH-stimulation test
12.1.2 GHRH-stimulation test
12.1.3 Combined anterior pituitary function test
12.1.4 Sample handling
12.2 Pituitary posterior lobe
12.2.1 Serial measurements of urine osmolality
12.2.2 Modified water deprivation test
12.2.3 Vasopressin measurements during hypertonic saline infusion
12.3 Thyroid
12.3.1 TSH-stimulation test
12.3.2 TRH-stimulation test
12.4 Adrenal cortex
12.4.1 ACTH-stimulation test
12.4.2 Low-dose dexamethasone suppression test (iv-LDDST)
12.4.3 High-dose dexamethasone suppression test (iv-HDDST)
12.4.4 Urinary corticoid:creatinine ratios with high-dose suppression test (UCCR + o-HDDST)
12.4.5 Urinary corticoid:creatinine ratios with low-dose suppression test (UCCR + o-LDDST)
12.5 Ovary and Testis
12.5.1 GnRH-stimulation test

13 Treatment Protocols
13.1 Pituitary
13.1.1 Hypophysectomy
13.2 Adrenal cortex
13.2.1 Primary hypoadrenocorticism
13.2.2 Treatment of hypercortisolism with trilostane
13.3 Endocrine pancreas
13.3.1 Treatment of diabetes mellitus in dogs and cats
13.3.2 Management of diabetic ketoacidosis
13.3.3 Treatment of hypoglycemia

14 Algorithms
14.1 Endocrine alopecia
14.2 Polyuria and polydipsia
14.3 Breeding management of the bitch
14.4 Weight loss in spite of good appetite

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
