The Future of Post-Human Education: A Preface to a New Theory of Teaching and Learning

Description: Is education really so valuable that, in this information age of ours, there are many who believe that, as Derek Bok, ex-President of Harvard University, once put it, "if you think education is expensive, try ignorance"?

This overvaluation of education in our information age can be contrasted with an opposing idea in the anti-establishment circle that, as Maya Angelou, author of the popular novel I Know Why the Caged Bird Sings, once caught the attention when she wrote "that some people, unable to go to school, were more educated and more intelligent than college professors." (BQ 2010)

Contrary to the two opposing sides of this debate on the nature of education (and other views as will be discussed in the book), the value of formal education (on one side of the controversy) and the importance of informal education (on the other side of the controversy) are neither possible nor desirable to the extent that their respective ideologues would like us to believe.

But one should not erroneously treat this challenge to the contrastive versions of the conventional wisdom on the future of education (and other views as will be clear later) as a suggestion that education is an useless endeavor, or that some fields of study (related to education) like philosophy, psychology, sociology, or even culture studies are to be dismissed. Surely, neither of these extreme views is reasonable either.

Instead, this book provides an alternative (better) way to understand the future of education, especially in the dialectic context of teaching and learning-while learning from different approaches in the literature but without favoring any one of them (nor integrating them, since they are not necessarily compatible with each other). Thus, this book offers a new theory to go beyond the existing approaches in the literature on education in a new original way.

If successful, this seminal project is to fundamentally change the way that we think about education, from the combined perspectives of the mind, nature, society, and culture, with enormous implications for the human future and what I originally called its "post-human" fate.

Contents:

Part One: Introduction

Chapter One. Introduction-The Value of Education
The Overvaluation of Education
The Different Faces of Education
The Theoretical Debate
The Heterodox Theory of Education
Theory and Meta-Theory
The Logic of Existential Dialectics
Sophisticated Methodological Holism
Chapter Outline
Some Clarifications

Part Two: Teaching

Chapter Two. Teaching and Its Duplicity
The Brightness of Teaching
Teaching and the Mind
Teaching and Nature
Teaching and Society
Teaching and Culture
The Darkness of Teaching

Part Three: Learning
Chapter Three. Learning and Its Ambivalence
The Benefits of Learning
Learning and the Mind
Learning and Nature
Learning and Society
Learning and Culture
The Costs of Learning

Part Four: Conclusion

Chapter Four. Conclusion-The Future of Education
Beyond Teaching and Learning
1st Thesis: The Absoluteness-Relativeness Principle
2nd Thesis: The Predictability-Unpredictability Principle
3rd Thesis: The Explicability-Inexplicability Principle
4th Thesis: The Preciseness-Vagueness Principle
5th Thesis: The Simplesness-Complicatedness Principle
6th Thesis: The Openness-Hiddenness Principle
7th Thesis: The Denseness-Emptiness Principle
8th Thesis: The Slowness-Quickness Principle
9th Thesis: The Expansion-Contraction Principle
10th Thesis: The Theory-Praxis Principle
11th Thesis: The Convention-Novelty Principle
12th Thesis: The Evolution-Transformation Principle
13th Thesis: The Symmetry-Asymmetry Principle
14th Thesis: The Regression-Progression Principle
15th Thesis: The Sameness-Difference Principle
16th Thesis: The Post-Human Rebellion
Beyond Formal and Informal Education
