Epidemiology: Endometrial Cancer

Description: Endometrial cancer is the most common gynecological cancer in the developed world and the fourth most common malignancy among women. Just over 82,000 women will be diagnosed with endometrial cancer in the seven major markets in 2010. Postmenopausal women in particular are at risk for endometrial cancer, having 10 times the risk of premenopausal women.

Scope of the report:
- Gain insight to market potential, including a robust 10-year epidemiology forecast of endometrial cancer incident cases.
- Understand the key epidemiologic risk factors associated with endometrial cancer.

Highlights:
- Between 2010 and 2019 total endometrial cancer incident cases in the seven major markets are forecasted to increase by 17%. Significant growth is expected in incident cases in Japan. This growth of almost 30% over the forecast period is most likely a combination of continued increasing trends of endometrial cancer and the aging population.
- Growth in the EU markets ranges from roughly 11% (Italy) to 22% (UK). When all five countries are taken together, the expected growth over the forecast period is almost 14%. Interestingly, lower growth rates will occur in the markets with greater numbers of incident cases, suggesting a plateau in the number of incident endometrial cancer cases.

Reasons to buy:
- What are the most robust sources for endometrial cancer incidence?
- How will the patient population change over the next decade in the US, Japan, and five major EU markets (France, Germany, Italy, Spain, and the UK)?
- How do changes in the population structure and risk factors affect the trend in incident endometrial cancer cases?

Contents:
- Executive Summary
- OVERVIEW
  - Catalyst
  - Summary
- DISEASE DEFINITION AND DIAGNOSIS CRITERIA
  - Disease definition
- GLOBAL VARIATION AND HISTORICAL TRENDS
  - Global variation and historical trends
- RISK FACTORS
  - Estrogen exposure is the key risk factor for endometrial cancer
    - Hormone therapy
    - Oral contraceptives
    - Parity
    - Menstrual history
  - Obesity
  - Tamoxifen use
  - Family history
- EPIDEMIOLOGIC FORECASTING OF ENDOMETRIAL CANCER
  - Sources of epidemiologic data
    - Cancer registries: age- and sex-specific incidence rates
    - Population denominators
  - Description of methods
    - Age stratification
Fax Order Form  
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/  

Order Information  
Please verify that the product information is correct and select the format(s) you require.  

Product Name: Epidemiology: Endometrial Cancer

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
