
Description: Over the next few years, the proprietary trading and hedge fund industries will migrate largely to automated trade selection and execution systems. Indeed, this is already happening. While several finance books provide C++ code for pricing derivatives and performing numerical calculations, none approaches the topic from a system design perspective. This book will be divided into two sections—programming techniques and automated trading system (ATS) technology—and teach financial system design and development from the absolute ground up using Microsoft Visual C++.NET 2005. MS Visual C++.NET 2005 has been chosen as the implementation language primarily because most trading firms and large banks have developed and continue to develop their proprietary algorithms in ISO C++ and Visual C++.NET provides the greatest flexibility for incorporating these legacy algorithms into working systems. Furthermore, the .NET Framework and development environment provide the best libraries and tools for rapid development of trading systems.

The first section of the book explains Visual C++.NET 2005 in detail and focuses on the required programming knowledge for automated trading system development, including object oriented design, delegates and events, enumerations, random number generation, timing and timer objects, and data management with STL.NET and .NET collections. Furthermore, since most legacy code and modeling code in the financial markets is done in ISO C++, this book looks in depth at several advanced topics relating to managed/unmanaged/COM memory management and interoperability. Further, this book provides dozens of examples illustrating the use of database connectivity with ADO.NET and an extensive treatment of SQL and FIX and XML/FIXML. Advanced programming topics such as threading, sockets, as well as using C+++.NET to connect to Excel are also discussed at length and supported by examples.

The second section of the book explains technological concerns and design concepts for automated trading systems. Specifically, chapters are devoted to handling real-time data feeds, managing orders in the exchange order book, position selection, and risk management. A .dll is included in the book that will emulate connection to a widely used industry API (Trading Technologies, Inc.'s XTAPI) and provide ways to test position and order management algorithms. Design patterns are presented for market taking systems based upon technical analysis as well as for market making systems using intermarket spreads.

As all of the chapters revolve around computer programming for financial engineering and trading system development, this book will educate traders, financial engineers, quantitative analysts, students of quantitative finance and even experienced programmers on technological issues that revolve around development of financial applications in a Microsoft environment and the construction and implementation of real-time trading systems and tools.

Teaches financial system design and development from the ground up using Microsoft Visual C++.NET 2005. Provides dozens of examples illustrating the programming approaches in the book. Chapters are supported by screenshots, equations, sample Excel spreadsheets, and programming code.

Contents:

Chapter 1 Introduction
Section I: Introduction to Visual C++.NET 2005
Chapter 2 The .NET Framework
Chapter 3 Tracking References
Chapter 4 Classes and Objects
Chapter 5 Reference Types
Chapter 6 Value Types
Chapter 7 Unmanaged Objects
Chapter 8 Composition
Chapter 9 Properties
Chapter 10 Structures and Enumerations
Chapter 11 Inheritance
Chapter 12 Converting and Casting
Chapter 13 Operator Overloading
Chapter 14 Delegates and Events
Chapter 15 Arrays
Chapter 16 Generating Random Numbers
Chapter 17 Time and Timers
Chapter 18 Input and Output Streams
Chapter 19 Exception Handling
Chapter 20 Collections
Chapter 21 STL/STL.NET
Chapter 22 DataSets
Chapter 23 Connecting to Databases
Chapter 24 Structured Query Language
Chapter 25 XML
Chapter 26 Financial Information Exchange Protocol
Chapter 27 Serialization
Chapter 28 Windows Services
Chapter 29 Setup and Installation Packages
Section II: Concurrency
Chapter 30 Threading
Chapter 31 Synchronization Classes
Chapter 32 Sockets
Section III: Interoperability and Connectivity
Chapter 33 Marshaling
Chapter 34 Interior and Pinning Pointers
Chapter 35 Connecting to Managed DLLs
Chapter 36 Connecting to Component Object Model (COM) DLLs with COM Interop
Chapter 37 Connecting to C++DLLs with Platform Invocation Services
Chapter 38 Connecting to Excel
Chapter 39 Connecting to TraderAPI
Chapter 40 Connecting to XTAPICconnection_Example
Section IV: Automated Trading Systems
Chapter 41 Building Trading Systems
Chapter 42 K" V Trading System Development Methodology
Chapter 43 Automated Trading System Classes
Chapter 44 Single-Threaded, Technical Analysis System
Chapter 45 Producer/Consumer Design Pattern
Chapter 46 Multithreaded, Statistical Arbitrage System

Ordering:
Order Online - http://www.researchandmarkets.com/reports/1757776/
Order by Fax - using the form below
Order by Post - print the order form below and send to
Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Building Automated Trading Systems. Financial Market Technology
Web Address: http://www.researchandmarkets.com/reports/1757776/
Office Code: SCAY8FUR

Product Format
Please select the product format and quantity you require:

Quantity
Hard Copy (Hard Back): USD 87 + USD 28 Shipping/Handling

* Shipping/Handling is only charged once per order.

Contact Information
Please enter all the information below in BLOCK CAPITALS

Title: Mr [ ] Mrs [ ] Dr [ ] Miss [ ] Ms [ ] Prof [ ]
First Name: ____________________________ Last Name: ____________________________
Email Address: * ____________________________
Job Title: ____________________________
Organisation: ____________________________
Address: ____________________________
City: ____________________________
Postal / Zip Code: ____________________________
Country: ____________________________
Phone Number: ____________________________
Fax Number: ____________________________

* Please refrain from using free email accounts when ordering (e.g. Yahoo, Hotmail, AOL)
Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
