Fish Physiology: Fish Neuroendocrinology, Vol 28

Description: The study of fish neuroendocrinology has had a significant impact on our general understanding of the functional roles and evolution of a variety of neurochemical messengers and systems. Not only do fish possess unique neuroendocrine features, they have also been and remain an important vertebrate models for the discovery of new neuropeptides. In the last fifty years, neuroendocrinologists have documented a complex and seemingly infinite number of interactions between hormones and nerve structures. Gradually emerging from this knowledge is an understanding of the specific neurohormonal pathways and the messengers responsible for maintaining homeostasis in an aquatic environment and for regulating the functional systems that allow for the highly diverse life histories and reproductive tactics of fish.

Despite its recent growth, breadth and unique attributes, there is no single text covering the discipline of fish neuroendocrinology. In fact, other than a few mammalian neuroendocrinology textbooks, there is a serious lack of texts in comparative neuroendocrinology. Currently, information on the anatomical organization and function of the various neuroendocrine systems in fish is only available in original research papers and reviews.

By providing a current and comprehensive volume that highlights the specific properties of fish neuroendocrinology, this book will go beyond being the only reference text for fish neuroendocrinologists and will also serve comparative physiologists, endocrinologists, neuroanatomists and behaviourists interested in understanding the reciprocal actions between the nervous and endocrine systems.

Highlights the specific properties of fish neuroendocrinology
Emphasises the range and variety of interactions between neurobiology and endocrinology
Discusses both anatomical and functional aspects of the Neuroendocrine system
Also serves comparative physiologists, endocrinologists, neuroanatomists and behaviourists interested in understanding the reciprocal actions between the nervous and endocrine systems.

Contents:
- Neuroendocrine circuits of the hypothalamus and pituitary
- Integrative circuits of the hypothalamus
- Endocrine targets of the hypothalamus
- The GnRH system and the neuroendocrine regulation of reproduction
- The neuroendocrine regulation of growth hormone secretion
- The neuroendocrine regulation of prolactin and somatolactin secretion
- The CRF system and the neuroendocrine regulation of the stress response and thyroid axis
- Neuroendocrine-immune interactions
- The neuroendocrine regulation of fluid intake and fluid balance
- Perspectives in Fish Neuroendocrinology

Ordering:
Order Online - http://www.researchandmarkets.com/reports/1761618/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Fish Physiology: Fish Neuroendocrinology, Vol 28
Web Address: http://www.researchandmarkets.com/reports/1761618/
Office Code: SCDKLDNH

Product Format
Please select the product format and quantity you require:

Quantity
- Hard Copy (Hard Back): USD 112 + USD 29 Shipping/Handling

* Shipping/Handling is only charged once per order.

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

- Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.
- Pay by check: Please post the check, accompanied by this form, to:
  Research and Markets,
  Guinness Center,
  Taylors Lane,
  Dublin 8,
  Ireland.
- Pay by wire transfer: Please transfer funds to:
  Account number 833 130 83
  Sort code 98-53-30
  Swift code ULSBIE2D
  IBAN number IE78ULSB98533083313083
  Bank Address Ulster Bank,
   27-35 Main Street,
   Blackrock,
   Co. Dublin,
   Ireland.
