Galvanized Steel Reinforcement in Concrete

Description: Reinforced concrete is one of the most widely used modern materials of construction. It is comparatively cheap, readily available, and suitable for a variety of building and construction applications.

This reference provides a detailed resource covering all aspects of this important material. Both servicability and durability aspects are well covered, with all the information needed to maximise the life of buildings constructed from it.

Containing an up-to-date and comprehensive collection of technical information and data from world renowned authors, it will be a valuable source of reference for academics, researchers, students and professionals alike.

Provides information vital to prolong the life of buildings constructed from this versatile material
Brings together a disparate body of knowledge from many parts of the world into a concise and authoritative text
Containing an up-to-date and comprehensive collection of technical information

Contents:
1. Galvanized Steel in Concrete

Ordering:
Order Online - [http://www.researchandmarkets.com/reports/1761982/](http://www.researchandmarkets.com/reports/1761982/)

Order by Fax - using the form below
