Modeling in Transport Phenomena. Edition No. 2

Description: Modeling in Transport Phenomena, Second Edition presents and clearly explains with example problems the basic concepts and their applications to fluid flow, heat transfer, mass transfer, chemical reaction engineering and thermodynamics. A balanced approach is presented between analysis and synthesis, students will understand how to use the solution in engineering analysis. Systematic derivations of the equations and the physical significance of each term are given in detail, for students to easily understand and follow up the material. There is a strong incentive in science and engineering to understand why a phenomenon behaves the way it does. For this purpose, a complicated real-life problem is transformed into a mathematically tractable problem while preserving the essential features of it. Such a process, known as mathematical modeling, requires understanding of the basic concepts. This book teaches students these basic concepts and shows the similarities between them. Answers to all problems are provided allowing students to check their solutions. Emphasis is on how to get the model equation representing a physical phenomenon and not on exploiting various numerical techniques to solve mathematical equations.

A balanced approach is presented between analysis and synthesis, students will understand how to use the solution in engineering analysis. Systematic derivations of the equations as well as the physical significance of each term are given in detail. Many more problems and examples are given than in the first edition - answers provided.

Contents:
1. Introduction
2. Molecular and Convective Transport
3. Interface Transport and Transfer Coefficients
4. Evaluation of Transfer Coefficients: Engineering Correlations
5. Rate of Generation in Momentum, Energy and Mass Transport
6. Steady-State Macroscopic Balances
7. Unsteady-State Macroscopic Balances
8. Steady Microscopic Balances Without Generation
9. Steady Microscopic Balances With Generation
10. Unsteady Microscopic Balances Without Generation
11. Unsteady Microscopic Balances With Generation

Ordering:
Order Online - http://www.researchandmarkets.com/reports/1768275/
Order by Fax - using the form below
Order by Post - print the order form below and send to
Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Modeling in Transport Phenomena. Edition No. 2
Web Address: http://www.researchandmarkets.com/reports/1768275/
Office Code: SCDKJ417

Product Format
Please select the product format and quantity you require:

<table>

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:

Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:

<table>
