Penetration Tester's Open Source Toolkit. Edition No. 3

Description: Penetration Tester's Open Source Toolkit, Third Edition, discusses the open source tools available to penetration testers, the ways to use them, and the situations in which they apply. The book consists of 10 chapters that focus on a specific area of penetration testing: tools of the trade; reconnaissance; scanning and enumeration; client-side attacks and human weaknesses; hacking database services; Web server and Web application testing; network devices; enterprise application testing; wireless penetrating testing; and building penetration test labs. Each chapter is organized to discuss objectives associated with the focus area, an approach to penetration testing of that area, core technologies for penetration testing, and open source tools that can be used to perform penetration testing. The chapters also include case studies where the tools that are discussed are applied.

This book is for people who are interested in penetration testing or professionals engaged in penetration testing. Those working in the areas of database, network, system, or application administration, as well as architects, can gain insights into how penetration testers perform testing in their specific areas of expertise and learn what to expect from a penetration test. This book can also serve as a reference for security or audit professionals.

- Details current open source penetration testing tools
- Presents core technologies for each type of testing and the best tools for the job
- New to this edition: Enterprise application testing, client-side attacks and updates on Metasploit and Backtrack

Contents:

Introduction
Chapter 1. Tools of the Trade
Chapter 2. Reconnaissance
Chapter 3. Scanning and Enumeration
Chapter 4. Client-side Attacks and Human Weaknesses
Chapter 5. Hacking Database Services
Chapter 6. Web Server and Web Application Testing
Chapter 7. Network Devices
Chapter 8. Enterprise Application Testing
Chapter 9. Wireless Penetration Testing
Chapter 10. Building Penetration Test Labs
