Plant Cell Biology

Description: Plant Cell Biology is a semester long course for undergraduates and graduate students which integrates mathematics and physics, two years of chemistry, genetics, biochemistry and evolution disciplines. Having taught this course for over ten years, the author uses his expertise to relate the background established in plant anatomy, plant physiology, plant growth and development, plant taxonomy, plant biochemistry, and plant molecular biology courses to plant cell biology. This integration attempts to break down the barrier so plant cell biology is seen as an entrée into higher science.

Distinguishing this book from papers that are often used for teaching the subject which use a single plant to demonstrate the techniques of molecular biology, this book covers all aspects of plant cell biology without emphasizing any one plant, organelle, molecule, or technique. Although most examples are biased towards plants, basic similarities between all living eukaryotic cells (animal and plant) are recognized and used to best illustrate for students cell processes.

- Thoroughly explains the physiological underpinnings of biological processes to bring original insight related to plants
- Includes examples throughout from physics, chemistry, geology, and biology to bring understanding to plant cell development, growth, chemistry and diseases
- Provides the essential tools for students to be able to evaluate and assess the mechanisms involved in cell growth, chromosome motion, membrane trafficking, and energy exchange
- Companion Web site provides support for all plant cell biology courses

Contents:

Chapter 1: On the Nature of Cells
Chapter 2: The Plasma Membrane
Chapter 3: Plasmodesmata
Chapter 4: The Endoplasmic Reticulum
Chapter 5: Peroxisomes
Chapter 6: The Golgi Apparatus
Chapter 7: Vacuoles
Chapter 8: Movement within the Endomembrane System
Chapter 9: Cytoplasmic Structure
Chapter 10: Actin and Microfilament-mediated Processes
Chapter 11: Tubulin and Microtubule-mediated Processes
Chapter 12: Cell Signaling
Chapter 13: Chloroplasts
Chapter 14: Mitochondria
Chapter 15: Origin of Organelles
Chapter 16: The Nucleus
Chapter 17: Ribosomes and Proteins
Chapter 18: The Origin of Life
Chapter 19: Cell Division
Chapter 20: The Extracellular Matrix

Ordering:

Order Online - http://www.researchandmarkets.com/reports/1769520/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
