Postharvest Handling. Food Science and Technology

Description: Postharvest Handling: A Systems Approach introduces a new concept in the handling of fresh fruits and vegetable. Traditional treatments have been either physiologically based with an emphasis on biological tissue or technologically based with an emphasis on storage and handling. This book integrates all processes from production practices through consumer consumption with an emphasis on understanding market forces and providing fresh product that meets consumer expectations. Postharvest physiologists and technologists across the disciplines of agricultural economics, agricultural engineering, food science and horticulture along with handlers of minimally-processed products within the fresh produce fruit and vegetable processing industries will find this to be an invaluable source of information.

Uses a systems approach that provides a unique perspective on the handling of fresh fruits and vegetables
Designed with the applied perspective to complement the more basic perspectives provided in other treatments
Provides the integrated, interdisciplinary perspective needed in research to improve the quality of fresh and minimally processed products
Emphasizes that the design of handling systems should be market-driven rather than concentrating on narrow specifics

Order by Fax - using the form below
Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit
