Turkish Immigrant Women`s Health in Austria. Edition No. 1

Description:

The book reviews background information about the history and legal aspects of Turkish migration in the last forty five years to Austria and other European countries like Germany.

The practical work of the second part compares integration indicators and health status and BMI. The prevalence of obesity has increased substantially over the past 2-3 decades in developed and developing countries. This with its link to numerous chronic diseases leads to the conclusion that this disease is responsible for a substantial proportion of total health-care costs. Knowing where the lack is the prevention and the cost reduction programs could run effectively.

Turkish Immigrant Women`s Health addresses the most detailed indicators and health check-ups of Turkish women living in Vienna who are not working. Furthermore the book can serve as an exploratory work as well as to improve cultural competency for a better understanding of migrant health.
