Heterosis Studies for Different Quantitative Traits In Wheat. Edition No. 1

Description: The work emphasizes on the possibility of making hybrid wheat cultivars for greater yield. The heterosis shown by different genotypes for some yield related traits indicates the potential of these genotypes for future breeding programmes. This work shows the performance of some crosses among some selected parents. The statistical procedures have been used to verify the significance of heterosis and heterobeltiosis.

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
