Induce breeding of Labeo calbasu. Edition No. 1

Description: Availability of required quantity of fish seed of desired species is one of the most important pre-requisite for successful fish farming. The widely cultured Indian major carps in inland waters like Calbasu (Labeo calbasu) normally do not breed in confined waters. The experiment was conducted to study the induced breeding of Labeo calbasu using synthetic hormone (Ovaprim). Induced Breeding is an artificial scientific technique whereby ripe fish breeders are stimulated by careful and intentional environmental manipulation. Induced breeding required an integrated system unit of different physical and biological facilities. These requirements are possible to fulfill by establishing a hatchery. Therefore, it is essential to develop the breeding technology of Labeo calbasu through proper dose optimization of synthetic hormone treatment for future development.

Ordering:

Order Online - http://www.researchandmarkets.com/reports/1903632/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Induce breeding of Labeo calbasu. Edition No. 1
Web Address: http://www.researchandmarkets.com/reports/1903632/
Office Code: SCDKWLO

Product Format
Please select the product format and quantity you require:

| Quantity | Hard Copy (Paper back): USD 57 + USD 29 Shipping/Handling |

* Shipping/Handling is only charged once per order.
