Microcontroller Based GPS Data Logging Techniques. Edition No. 1

Description: The GPS system is a precise navigation and positioning system. Developed in 1973 by the Department of Defence (USA), the GPS was originally designed as a military tool to assist soldiers, military vehicles, planes, and ships to accurately determine their locations on Earth. Today, GPS is used widely in military, commercial, industrial, and leisure applications. One of the widest commercial uses of GPS is on street-level route guidance that helps a driver to navigate to an address or to a post-code. This book describes the basic principles of the GPS system and then the design of a microcontroller based GPS data logger device is given in detail, including the full source code. With the help of the device, the coordinates of a person, animal, or a vehicle can be stored on an SD card and then the Google Earth mapping program can be used to display the user track on a street-level map.

Ordering:
Order Online - http://www.researchandmarkets.com/reports/1906190/
Order by Fax - using the form below
Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit

 Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
