Micro-Hydropower Systems. Edition No. 1

Description: This book is devoted to small hydropower systems of capacity ranging from hundred watts to hundred kilowatts and is named as micro-hydropower systems. Micro-hydropower systems contain a number of devices including turbines, generators, voltage converters/inverters, voltage and frequency regulators etc used for the conversion of hydropower into electricity of standard voltage and frequency. Development and implementation of micro-hydropower systems is possible in many countries that have some hydropower resources. Micro-hydropower systems would be very useful especially in mountain countries, where it is difficult to construct long transmission lines. At the same time it is obvious that socio-economical development of their remote and mountain areas depend on energy supply to the population, agriculture and industry there. The utilization of the hydropower in these regions will definitely elevate living standards of the community, develop the virgin and unused lands, and populate new lands. Utilization of low power hydropower systems will not create environmental pollution except of visual intrusion.

Ordering:

Order Online - http://www.researchandmarkets.com/reports/1915274/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

- Product Name: Micro-Hydropower Systems. Edition No. 1
- Web Address: http://www.researchandmarkets.com/reports/1915274/
- Office Code: SCDKELOV

Product Format
Please select the product format and quantity you require:
