The Afghan Marble. Edition No. 1

Description: The Afghan marble quality, variety, color, and size of quarries paves the way for a great potential in the demand and supply chains of the Afghan marble in the domestic, regional, and international markets. Studies and researches so far conducted for this industry in Afghanistan, have not sufficiently analyzed the various factors involved in the entire process and therefore do not give a clear picture to the investors so that they dare to invest. This book analyzes the entire industry from quarry all the way down to the actual production and marketing of the marble products in Afghanistan and suggests to the investors innovative approaches that would increase the productivity and competitive position of the Afghan marble. The focus point of the analysis is “competitiveness”. It consists of a brief review of the relevant literature, the industry productivity in compare with the concerned neighboring countries; the marble market trend worldwide as well as in-country; and the analysis of the overall marble situation. The study draws conclusion along with recommendations for the relevant players on the ground.
