Transport system. Edition No. 1

Description: Pricing policies to reduce environmental harmful transport emissions? Politicians face tough choices. What are the costs of these proposals? Will the plan result in the expected impacts? What are the risks? Who wins, who loses? This thesis is about the practice of helping public decision making by answering these kinds of questions. Four cases of policy-related ex ante evaluations are described. The evaluation refers to forward-looking assessment of the likely future effects of new policies of proposals.
