Mechanical Properties of Sugar Palm Fiber-Epoxy Composites. Edition No. 1

Description: Growing environmental awareness has resulted in a renewed interest in the use of natural material for many applications. This paradigm has forced industries like automotive, packaging and construction to search for new materials to make the conventional composite materials be a environmentally friendly material. In this work an attempt is made to highlight the potential use of sugar palm (Arenga pinnata) fiber in reinforcing polymer composites. The aims of this work is to determine the mechanical properties of sugar palm fiber reinforced epoxy polymer composites. The fiber was treated by alkali solution with certain concentration and during several soaking time. This book is dedicated to academics, lecturers, researchers and students also everyone in public sectors who interested in research and applications on natural fibers reinforced polymer composites.

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:

Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
