PLM RFP Template (Product Lifecycle Management)

Description: The Product Lifecycle Management (PLM) Comprehensive RFI/RFP Template lists and describes 1775 features and functions found in Product Lifecycle Management (PLM) Comprehensive software solutions. This PLM Template can help you save time, control costs, and communicate clearly with vendors at nearly every stage of your Product Lifecycle Management (PLM) Comprehensive software selection projects.

Features and functions included in this PLM Template:

- Core PLM for both discrete and process industries (Engineering Change Management
  - Data Vaulting
  - BOM Management
  - Recipe Management
  - Product Cost Estimation
  - etc.)
- Product Development and Portfolio Management
- Manufacturing Process Management (MPM)
- Ideation & Requirements Management
- Service Data Management
- Regulatory and Compliance
- and Application Technology

This functional and technical requirement set template covers industry-standard functional criteria of PLM that can help you easily gather and prioritize your business needs in a simple and categorized excel document. More than a RFP template, it is a working document that serves as a knowledge base reference throughout the life-span of your PLM software project.

Use this template to gather your PLM requirements, build RFIs and RFPs, and track the progress of your software implementation.

Gather Your PLM Requirements Quickly and Effectively

- Identify and prioritize the features and functions you need instead of building a list from scratch.
- Easily add your company's unique PLM requirements.
- Find out what features and functions vendors support, and how they support them.

Collect Clear PLM RFI and RFP Responses

- Improve vendor participation by issuing RFIs that vendors can understand, and respond to easily.
- Use RFI responses to create lists of requirements for your RFPs or requests for quotation (RFQs).
- Make sure that vendors understand and can support all your requirements.

Eliminate PLM Implementation Surprises

- Get a clear picture of any required customizations.
- Help PLM vendors accurately cost required development work.
- Compare your existing systems to the winning solution (gap analysis).
