LTE, WiMAX and WLAN Network Design, Optimization and Performance Analysis

Description: A technological overview of LTE and WiMAX

LTE, WiMAX and WLAN Network Design, Optimization and Performance Analysis provides a practical guide to LTE and WiMAX technologies introducing various tools and concepts used within. In addition, topics such as traffic modelling of IP-centric networks, RF propagation, fading, mobility, and indoor coverage are explored; new techniques which increase throughput such as MIMO and AAS technology are highlighted; and simulation, network design and performance analysis are also examined. Finally, in the latter part of the book Korowajczuk gives a step-by-step guide to network design, providing readers with the capability to build reliable and robust data networks.

By focusing on LTE and WiMAX this book extends current network planning approaches to next generation wireless systems based on OFDMA, providing an essential resource for engineers and operators of fixed and wireless broadband data access networks. With information presented in a sequential format, LTE, WiMAX and WLAN Network Design, Optimization and Performance Analysis aids a progressive development of knowledge, complementing latter graduate and postgraduate courses while also providing a valuable resource to network designers, equipment vendors, reference material, operators, consultants, and regulators.

Key Features:
- One of the first books to comprehensively explain and evaluate LTE
- Provides an unique explanation of the basic concepts involved in wireless broadband technologies and their applications in LTE, WiMAX, and WLAN before progressing to the network design
- Demonstrates the application of network planning for LTE and WiMAX with theoretical and practical approaches
- Includes all aspects of system design and optimization, such as dynamic traffic simulations, multi-layered traffic analysis, statistical interference analysis, and performance estimations

Contents:
List of Figures xix
List of Tables xxxv
About the Author xli
Preface xliii
Acknowledgements xlv
List of Abbreviations xlvii
Introduction 1
1 The Business Plan 5
1.1 Introduction 5
1.2 Market Plan 5
1.3 The Engineering Plan 7
1.4 The Financial Plan 8
1.5 Business Case Questionnaire 11
4.5 Carrier Modulation 87
5 RF Channel Analysis 95
5.1 The Signal 95
5.2 The RF Channel 101
5.3 RF Signal Propagation 102
5.4 RF Channel in the Frequency Domain 107
5.5 RF Channel in Time Domain 115
5.6 RF Channel in the Power Domain 120
5.7 Standardized Channel Models 123
5.8 RF Environment 126
5.9 Fading 128
6 RF Channel Performance Prediction 139
6.1 Advanced RF Propagation Models 139
6.2 RF Measurements and Propagation Model Calibration 163
6.3 RF Interference Issues 172
6.4 Interference Mitigation Techniques 180
6.5 RF Spectrum Usage and Resource Planning 181
6.6 Availability 187
7 OFDM 193
7.1 Multiplexing 193
7.2 Other PAPR Reduction Methods 201
7.3 De-Multiplexing 201
7.4 Cyclic Prefix 202
7.5 OFDMA 203
7.6 Duplexing 204
7.7 Synchronization 207
7.8 RF Channel Information Detection 208
7.9 Error Correction Techniques 211
7.10 Resource Allocation and Scheduling 215
7.11 Establishing Wireless Data Communications 216
8 OFDM Implementation 221
18.5 Customer Premises Equipment (CPE) 563
18.6 Link Budget 565
18.7 Backhaul Equipment 565
18.8 Land Line Access Points of Presence (PoP) 570
18.9 List of Available Site Locations 570
19 Wireless Network Design 573
19.1 Field Measurement Campaign 573
19.2 Measurement Processing 575
19.3 Propagation Models and Parameters 579
19.4 Site Location 582
19.5 Run Initial Site Predictions 586
19.6 Static Traffic Simulation 593
19.7 Adjust Design for Area and Traffic Coverage 595
19.8 Configure Backhaul Links and Perform Backhaul Predictions 595
19.9 Perform Signal Level Predictions with Extended Radius 597
20 Wireless Network Optimization 599
20.1 Cell Enhancement or Footprint Optimization 599
20.2 Resource Optimization 603
21 Wireless Network Performance Assessment 615
21.1 Perform Dynamic Traffic Simulation 615
21.2 Performance 620
21.3 Perform Network Performance Predictions 625
21.4 Backhaul Links Performance 655
21.5 Analyze Performance Results, Analyze Impact on CAPEX, OPEX and ROI 661
22 Basic Mathematical Concepts Used in Wireless Networks 663
22.1 Circle Relationships 663
22.2 Numbers and Vectors 665
22.3 Functions Decomposition 668
22.4 Sinusoids 670
22.5 Fourier Analysis 674
22.6 Statistical Probability Distributions 676
Appendix: List of Equations 689

Ordering:

Order Online - [http://www.researchandmarkets.com/reports/1935924](http://www.researchandmarkets.com/reports/1935924)

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: LTE, WiMAX and WLAN Network Design, Optimization and Performance Analysis
Web Address: http://www.researchandmarkets.com/reports/1935924/
Office Code: SCLOPG9X

Product Format
Please select the product format and quantity you require:

| Quantity | Hard Copy (Hard Back): | USD 156 + USD 28 Shipping/Handling |

* Shipping/Handling is only charged once per order.

Contact Information
Please enter all the information below in BLOCK CAPITALS

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:

Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
