Water Utilities in Italy

Description:

Water Utilities in Italy industry profile provides top-line qualitative and quantitative summary information including: market size (value 2010-14, and forecast to 2019). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market. Essential resource for top-line data and analysis covering the Italy water utilities market. Includes market size data, textual and graphical analysis of market growth trends, leading companies and macroeconomic information.

Highlights

- The water utilities industry consists of all water that is collected, treated and distributed to agricultural, industrial, and residential end-users. The industry is valued using average annual end-user prices alongside consumption volumes. All currency conversions used in the creation of this report have been calculated using constant 2013 annual average exchange rates.

- The Italian water utilities industry is forecast to generate total revenues of $14.6bn in 2014, representing a compound annual rate of change (CARC) of -1.7% between 2010 and 2014.

- Industry consumption volume is forecast to decline with a CARC of -4% between 2010-2014, to reach a total of 30 billion cubic meters in 2014.

- The performance of the industry is forecast to decline further but at a slower pace, with an anticipated CARC of -1% for the five-year period 2014 - 2019, which is expected to drive the industry to a value of $13.9bn by the end of 2019.
