What was the size of the Italy utilities market by value in 2015?

What will be the size of the Italy utilities market in 2020?

What factors are affecting the strength of competition in the Italy utilities market?

How has the market performed over the last five years?

What are the main segments that make up Italy's utilities market?

Key Highlights
- The utilities industry consists of the electricity, gas and water markets. The electricity retailing market consists of the net consumption of electricity by end-users, segmented by industrial, transportation, commercial & public services, and residential consumption. The market value has been calculated according to average annual electricity prices. The gas utilities market is calculated as the total value of natural gas used by industrial, (including energy generators purchasing gas from utilities), commercial, residential, and other end-users (including transport and agriculture users). The water utilities industry consists of all water that is collected, treated and distributed to end-users. The industry has been valued according to average annual end-user prices. All currency conversions used in the creation of this report have been calculated using constant 2014 annual average exchange rates.

- The Italian utilities industry is forecast to generate total revenues of $128.9bn in 2015, representing a compound annual rate of change (CAGR) of -0.6% between 2011 and 2015.

- The Electricity segment is expected to be the industry's most lucrative in 2015, with total revenues of $81.6bn, equivalent to 63.3% of the industry's overall value.

- The performance of the industry is forecast to accelerate, with an anticipated CAGR of 1.2% for the five-year period 2015 - 2020, which is expected to drive the industry to a value of $136.5bn by the end of 2020.
