Utilities in Russia

Description:
Utilities in Russia industry profile provides top-line qualitative and quantitative summary information including: market size (value 2011-15, and forecast to 2020). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market. Essential resource for top-line data and analysis covering the Russia utilities market. Includes market size and segmentation data, textual and graphical analysis of market growth trends, leading companies and macroeconomic information.

Synopsis
Save time carrying out entry-level research by identifying the size, growth, major segments, and leading players in the utilities market in Russia

Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the utilities market in Russia

Leading company profiles reveal details of key utilities market players' global operations and financial performance

Add weight to presentations and pitches by understanding the future growth prospects of the Russia utilities market with five year forecasts

Macroeconomic indicators provide insight into general trends within the Russia economy

Reasons To Buy
What was the size of the Russia utilities market by value in 2015?
What will be the size of the Russia utilities market in 2020?
What factors are affecting the strength of competition in the Russia utilities market?
How has the market performed over the last five years?
What are the main segments that make up Russia's utilities market?

Key Highlights
- The utilities industry consists of the electricity, gas and water markets. The electricity retailing market consists of the net consumption of electricity by end-users, segmented by industrial, transportation, commercial & public services, and residential consumption. The market value has been calculated according to average annual electricity prices. The gas utilities market is calculated as the total value of natural gas used by industrial, (including energy generators purchasing gas from utilities), commercial, residential, and other end-users (including transport and agriculture users). The water utilities industry consists of all water that is collected, treated and distributed to end-users. The industry has been valued according to average annual end-user prices. All currency conversions used in the creation of this report have been calculated using constant 2014 annual average exchange rates.

- The Russian utilities industry is expected to generate total revenues of $102.1bn in 2015, representing a compound annual growth rate (CAGR) of 7% between 2011 and 2015.

- The Electricity segment is expected to be the industry's most lucrative in 2015, with total revenues of $49.9bn, equivalent to 48.9% of the industry's overall value.

- The performance of the industry is forecast to decelerate, with an anticipated CAGR of 6.2% for the five-year period 2015 - 2020, which is expected to drive the industry to a value of $137.9bn by the end of 2020.
