Software in Taiwan

Description:

Software in Taiwan industry profile provides top-line qualitative and quantitative summary information including: market size (value 2009-13, and forecast to 2018). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market. Essential resource for top-line data and analysis covering the Taiwan software market. Includes market size and segmentation data, textual and graphical analysis of market growth trends, leading companies and macroeconomic information.

Highlights

- The computer software market consists of systems and application software. Systems software comprises operating systems, network and database management and other systems software. Application software comprises general business productivity and home use applications, cross-industry and vertical market applications, and other application software. Market value figures are assessed at manufacturer selling price (MSP), based on revenues from software sales and licenses. Any currency conversions used in the creation of this report have been calculated using constant 2013 annual average exchange rates.

- The Taiwanese software market had total revenues of $3.7bn in 2013, representing a compound annual growth rate (CAGR) of 4.6% between 2009 and 2013.

- The general business productivity and home use applications segment was the market's most lucrative in 2013, with total revenues of $1.6bn, equivalent to 44.1% of the market's overall value.

- The performance of the market is forecast to accelerate, with an anticipated CAGR of 9.7% for the five-year period 2013 - 2018, which is expected to drive the market to a value of $5.8bn by the end of 2018.
