
Description: The world's population is averaging a growth rate of around 1.1% annually. This is creating a greater demand for improved water supplies and sanitation, especially in developing countries and urban areas. As stronger population growth is generally observed in these regions. They may also have more challenging requirements to meet the water target under the UN's Millennium Development Goals (MDGs). A target of reducing 'the proportion of people without sustainable access to safe drinking water and sanitation' for eligible countries by half by 2015.

NRG Expert provides a comprehensive overview and analysis of the Global Water and Waste Markets. It looks at the market, the country markets, the major players, pollution, private sector investment and much more.

Key Reasons To Purchase This Research
- Make informed business decisions through a clear global understanding of this market.
- Design business strategies by understanding the trends, developments and predictions
- Understand the trends, developments and opportunities.
- Prepare market size evaluations and forecasts
- Manipulate the in-depth data to meet your requirements

What's In This Report?
- Coverage of water supply, water pollution and water treatment
- Market overview encompassing service providers, water utilities, private investment, private sector participation (PSP) and global multi utilities
- Water and waste data for 177 countries worldwide
- In depth reporting of the economic situation and water and waste markets including utilities, government utilities and much more for 177 countries worldwide
- Analysis of major water companies

Background To This Research

The world's population is averaging a growth rate of around 1.1% annually. This is creating a greater demand for improved water supplies and sanitation, especially in developing countries and urban areas. As stronger population growth is generally observed in these regions. They may also have more challenging requirements to meet the water target under the UN's Millennium Development Goals (MDGs). A target of reducing 'the proportion of people without sustainable access to safe drinking water and sanitation' for eligible countries by half by 2015.

Private sector
To meet the growing demand for safe water and sanitation more private sector involvement will be needed in the water sector. Due to the investment involved and expertise needed. The share of private companies in the water and wastewater market is forecast to increase from 8% of the global population in 2003 to 17% in 2015.

Water companies
Contracts for water and waste projects can involve different degrees of private and public sector involvement, and from small players to global companies. Several major water companies dominate the water market worldwide. These companies include Ondeo/Suez, Veolia Water, Thames Water, American Water, Berlin Wasser and Bouygues/Saur.

Country
State utilities will still dominate the water and wastewater market for the foreseeable future. However, there is private sector participation in water and waste sector. Countries requiring a large investment in the water sector and limited capital, are expecting to have more private sector involvement.
Access to safe drinking water and waste treatment varies from country-to-country. It also means the investment required to meet drinking water and waste goals varies.
