
Description: The concrete tools manufacturing enterprises need to thrive in today's global environment

For a manufacturing enterprise to succeed in this current volatile economic environment, a revolution is needed in restructuring its three main components: product design, manufacturing, and business model. The Global Manufacturing Revolution is the first book to focus on these issues. Based on the author's long-standing course work at the University of Michigan, this unique volume proposes new technologies and new business strategies that can increase an enterprise's speed of responsiveness to volatile markets, as well as enhance the integration of its own engineering and business.

Introduced here are innovations to the entire manufacturing culture:

An original approach to the analysis of manufacturing paradigms
Suggested methods for developing creativity in product design
A quantitative analysis of manufacturing system configurations
A new manufacturing "reconfigurable" paradigm, in which the speed of responsiveness is the prime business goal
An original approach to using information technology for workforce empowerment

The book also offers analysis and original models of previous manufacturing paradigms' technical and business dimensions—including mass production and mass customization—in order to fully explain the current revolution in global manufacturing enterprises. In addition, 200 original illustrations and pictures help to clarify the topics.

Globalization is creating both opportunities and challenges for companies that manufacture durable goods. The tools, theories, and case studies in this volume will be invaluable to engineers pursuing leadership careers in the manufacturing industry, as well as to leaders of global enterprises and business students who are motivated to lead manufacturing enterprises and ensure their growth.

Contents: Preface.

Acknowledgments.

1 Globalization and Manufacturing Paradigms.
1.1 The Importance of Manufacturing to Society.
1.2 The Basics of Manufacturing in Large Quantities.
1.3 The 1990s: A Decade of Intensified Globalization.
1.4 The Global Manufacturing Revolution.
1.5 The Manufacturing Paradigm Model.
1.6 Four Major Manufacturing Paradigms.
1.7 Paradigm Transitions Over Time.
Problems.
References.

2 Product Invention Strategy.
2.1 Technology-Driven Products.
2.2 Customer-Driven Products.
2.3 Competition-Driven Products.
2.4 Classification of Product Inventions.
2.5 Product Development for Globalization.
2.6 The Product Development Process.
2.7 Head in the Sky, Feet on the Ground—Be a Dreamer on a Solid Foundation.
Problems.
References.

3 Customized, Personalized and Reconfigurable Products.
3.1 Introduction to Customization.
3.2 Design for Mass Customization.
3.3 Personalized Products.
3.4 Product Modularity.
3.5 Reconfigurable Products.
3.6 Design of Customized and Reconfigurable Products.
Problems.
References.

4 Mass Production and Lean Manufacturing.
4.1 The Principles of Mass Production.
4.2 Supply and Demand.
4.3 The Mathematical Model of Mass Production.
4.4 Lean Production—Goals and Benefits.
4.5 The Principles of Lean Production.
Problems.
References.

5 Analysis of Mass Customization.
5.1 Introduction to Mass Customization.
Ordering:

Order Online - http://www.researchandmarkets.com/reports/2172076/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.
