Developing Intelligent Agent Systems. A Practical Guide. Wiley Series in Agent Technology

Description: Build your own intelligent agent system...

Intelligent agent technology is a tool of modern computer science that can be used to engineer complex computer programmes that behave rationally in dynamic and changing environments. Applications range from small programmes that intelligently search the Web buying and selling goods via electronic commerce, to autonomous space probes.

This powerful technology is not widely used, however, as developing intelligent agent software requires high levels of training and skill. The authors of this book have developed and tested a methodology and tools for developing intelligent agent systems. With this methodology (Prometheus) developers can start agent-oriented designs and implementations easily from scratch saving valuable time and resources.

Developing Intelligent Agent Systems not only answers the questions “what are agents?” and “why are they useful?” but also the crucial question: “how do I design and build intelligent agent systems?” The book covers everything a practitioner needs to know to begin to effectively use this technology - including an introduction to the notion of agents, a description of the concepts involved, and a software engineering methodology.

Read on for:
- a practical step-by-step introduction to designing and building intelligent agent systems.
- a full life-cycle methodology for developing intelligent agent systems covering specification, analysis, design and implementation of agents.
- PDT: Prometheus Design Tool – software support for the Prometheus design process.
- the example of an electronic bookstore to illustrate the design process throughout the book.

Electronic resources including the Prometheus Design Tool (PDT), can be found at: company website

This book is aimed at industrial software developers, software engineers and at advanced undergraduate students. It assumes knowledge of basic software engineering but does not require knowledge of Artificial Intelligence or of mathematics. Familiarity with Java will help in reading the examples in chapter 10.

Contents: Foreword from the Series Editor.

Preface.

Acknowledgements.

1. Agents and Multi-Agent Systems.

3. Overview of the Prometheus Methodology.

5. Architectural Design: Specifying the Agent Types.

7. Finalizing the Architectural Design.

10. Implementing Agent Systems.
Appendix A: Electronic Bookstore.
Appendix B: Descriptor Forms.
Appendix C: The AUML Notation.
Bibliography.
Index.

Ordering:
Order Online - [http://www.researchandmarkets.com/reports/2172190/](http://www.researchandmarkets.com/reports/2172190/)
Order by Fax - using the form below
Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Developing Intelligent Agent Systems. A Practical Guide. Wiley Series in Agent Technology
Web Address: http://www.researchandmarkets.com/reports/2172190/
Office Code: SCD4ZUN7

Product Format
Please select the product format and quantity you require:

**Quantity**

- Hard Copy (Hard Back): [ ] USD 94 + USD 29 Shipping/Handling

* Shipping/Handling is only charged once per order.

Contact Information
Please enter all the information below in **BLOCK CAPITALS**

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer:
Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
