Soil Erosion. Processes, Prediction, Measurement, and Control

Description: A thorough look at physical properties of soil erosion

Soil erosion has been responsible for billions of dollars of damage during the past thirty years, in the United States alone. Soil Erosion provides complete coverage of the physical causes, processes, and effects of this environmental problem from its origins to planning for future conservation and remediation.

This book focuses on the process of soil erosion and erosion–control principles independent of land use. Coverage includes the primary factors that influence soil erosion, various types of erosion, erosion–prediction technology, erosion measurements, erosion and sediment control, and conservation of the land. Practical material on erosion models is featured along with ways to use these models as erosion–control tools. Details of conservation planning and government policy are presented in a historical context, supported by examples of working public programs and technical tools for conservation planning. End–of–chapter summaries and comprehensive appendices on soils, hydrology, and soil–erosion Web sites make this a complete and easy–to–use introduction to soil–erosion processes, prediction, measurement, and control.

Supplemented with more than 100 photographs, drawings, and tables, Soil Erosion: Processes, Prediction, Measurement, and Control is an essential book for students of soil management, erosion, conservation, earth science, civil engineering, and agriculture; employees of soil conservation districts; government employees in the Natural Resources Conservation Service, Forest Service, USDA, EPA, and Bureau of Land Management; and soil scientists.

Contents:

Preface.

Acknowledgments.

1. Introduction.

Physical and Economic Significance of Erosion.

Social Significance of Erosion.

Soil–Erosion Research.

Terminology of Erosion.

Development of Landscapes: A Context for Erosion.

Summary.

Suggested Readings.

2. Primary Factors Influencing Soil Erosion.

Water Erosion.

Wind Erosion.

Integrated Site Perspective.

Summary.

Suggested Readings.
3. Types of Erosion.
   Water Erosion.
   Wind Erosion.
   Links between Wind and Water Erosion.
   Mechanical Movement of Soil.
   Summary.
   Suggested Readings.

   Basic Principles Common to Water and Wind Erosion.
   Water Erosion.
   Wind Erosion.
   Summary.
   Suggested Readings.

5. Erosion–Prediction Technology.
   Elements of Erosion–Model Mathematics.
   Types of Mathematical Erosion Models.
   Other Types of Erosion Models.
   Steps in Developing an Erosion Model.
   Choosing a Model.
   Sensitivity Analysis.
   Summary.
   Suggested Readings.

   Reasons to Measure Erosion.
   Types of Erosion Measurement.
   Erosion–Measurement Practices.
   Selected Measurement Techniques.
   Evaluation of Erosion Measurement.
   Summary.
   Suggested Readings.

7. Erosion and Sediment Control.
Suggested Readings.

Appendix C: Soil Erosion Web Sites.

Ordering:

Order Online - http://www.researchandmarkets.com/reports/2214159/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit

http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Soil Erosion. Processes, Prediction, Measurement, and Control
Web Address: http://www.researchandmarkets.com/reports/2214159/
Office Code: SCD24B92

Product Format
Please select the product format and quantity you require:

<table>
<thead>
<tr>
<th>Quantity</th>
<th>USD 181 + USD 29 Shipping/Handling</th>
