Metal Fatigue in Engineering. 2nd Edition

Description: Classic, comprehensive, and up-to-date

Metal Fatigue in Engineering

Second Edition

For twenty years, Metal Fatigue in Engineering has served as an important textbook and reference for students and practicing engineers concerned with the design, development, and failure analysis of components, structures, and vehicles subjected to repeated loading.

Now this generously revised and expanded edition retains the best features of the original while bringing it up to date with the latest developments in the field.

As with the First Edition, this book focuses on applied engineering design, with a view to producing products that are safe, reliable, and economical. It offers in-depth coverage of today's most common analytical methods of fatigue design and fatigue life predictions/estimations for metals. Contents are arranged logically, moving from simple to more complex fatigue loading and conditions. Throughout the book, there is a full range of helpful learning aids, including worked examples and hundreds of problems, references, and figures as well as chapter summaries and "design do's and don'ts" sections to help speed and reinforce understanding of the material.

The Second Edition contains a vast amount of new information, including:
- Enhanced coverage of micro/macro fatigue mechanisms, notch strain analysis, fatigue crack growth at notches, residual stresses, digital prototyping, and fatigue design of weldments
- Nonproportional loading and critical plane approaches for multiaxial fatigue
- A new chapter on statistical aspects of fatigue

Contents:

Introduction and Historical Overview.

Fatigue Design Methods.

Macro/Micro Aspects of Fatigue of Metals.

Fatigue Tests and Stress-Life (S-N) Approach.

Cyclic Deformation and the Strain-Life (-N) Approach.

Fundamentals of LEFM and Applications to Fatigue Crack Growth.

Notches and Their Effects.

Residual Stresses and Their Effects on Fatigue Resistance.

Fatigue from Variable Amplitude Loading.

Multiaxial Stresses.

Environmental Effects.

Fatigue of Weldments.

Statistical Aspects of Fatigue.

Appendix.
Indexes.

Ordering:

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
