Socially ADDep. Teaching Social Skills to Children with ADHD, LD, and Asperger's. Revised Edition

Description: Socially ADDep provides an easy-to-follow program for parents and educators to teach kids with special needs the hidden rules of social behavior. Unlike other social skills programs, this acclaimed approach teaches children to see themselves as others do—covering everything from body language and being a good listener to dealing with teasing—demonstrating clearly what kids need to do to "fit in."

Designed to be used with children aged eight through thirteen, Socially ADDep deciphers the complex rules of nonverbal language into friendly, bite-sized morsels that kids can understand and addresses the most common social errors made by children with special needs. The author breaks the social skills training into ten lessons that can be taught as sequential building blocks and help children to:

- Understand friendships
- Become a good listener
- Use conversational skills
- Understand the importance of body language
- Understand tone of voice
- Recognize friendly behavior
- Join a group or an ongoing activity
- Deal with teasing
- Manage anger
- Understand cell phone etiquette and the rules of cyberspace

Socially ADDep is presented in a user-friendly, hands-on workbook format, complete with reproducible student worksheets. For any parent or educator who works with children with special needs—including ADHD, learning disabilities, Asperger's, high-functioning autism, and nonverbal learning disabilities—this book will prove invaluable.
