2nd Edition

Description: The classic text for pilots on flight theory and aerodynamics now in an updated Second Edition

Flight Theory and Aerodynamics, the basic aeronautics text used by the United States Air Force in their Flying Safety Officer course, is the book that brings the science of flight into the cockpit. Designed for the student with little engineering or mathematical background, the book outlines the basic principles of aerodynamics and physics, using only a minimal amount of high school level algebra and trigonometry necessary to illustrate key concepts.

This expanded seventeen chapter Second Edition reflects the cutting edge of aeronautic theory and practice, and has been revised, reorganized, and updated with 30% new information including a new chapter on helicopter flight. Central to the book’s structure is a clear description of aeronautic basics what lifts and drives an aircraft, and what forces work for and against it all detailed in the context of the design and analysis of today’s aircraft systems:
- Atmosphere and airspeed measurement
- Airfoils and aerodynamic forces
- Lift and drag
- Jet aircraft basic and applied performance
- Prop aircraft basic and applied performance
- Slow and high-speed flight
- Takeoff, landing, and maneuvering performance

The book’s practical, self-study format includes problems at the end of each chapter, with answers at the back of the book, as well as chapter-end summaries of symbols and equations. An ideal text for the USN Aviation Safety Officer and the USAAA’s Aviation Safety Officer courses, as well as for professional pilots, student pilots, and flying safety personnel, Flight Theory and Aerodynamics is a complete and accessible guide to the subject, updated for the new millennium.

Contents:
- Atmosphere and Airspeed Measurement.
- Airfoils and Aerodynamic Forces.
- Lift.
- Drag.
- Jet Aircraft Basic Performance.
- Propeller Aircraft -- Basic Performance.
- Propeller Aircraft -- Applied Performance.
- Helicopter Flight Theory.
- Slow-Speed Flight.
- Takeoff Performance.
- Landing Performance.
- Maneuvering Performance.
Longitudinal Stability and Control.
Directional and Lateral Stability and Control.
High-Speed Flight.
Answers to Problems.
References.
Index.

Ordering:
Order Online - http://www.researchandmarkets.com/reports/2220239/
Order by Fax - using the form below
Order by Post - print the order form below and send to
Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number 833 130 83
Sort code 98-53-30
Swift code ULSBIE2D
IBAN number IE78ULSB98533083313083
Bank Address Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
