Rationing. Talk and Action in Healthcare

Description: Provides up-to-date coverage of current thinking on rationing. The first part of the book consists of a series of debates between leading authorities putting forward their views for and against some of the most controversial issues in healthcare, such as rationing by age, and the role of central government. The second part makes suggestions for action, drawing comparisons with health care systems overseas, on the ethical uses of resources, the rationing of drugs by hospitals, and the role of citizens’ juries. The book should be of interest to healthcare workers, managers, public health physicians and health economists.
