Calculations for the Veterinary Professional. Revised Edition

Description: Veterinary professionals perform countless calculations on a daily basis. Calculations for the Veterinary Professional combines the perspectives of a pharmacist, the author, Vicki McConnell, and a clinician, the editor, Branston Ritchie, to guide the reader through step-by-step computations followed by practice problems at the end of each section. Veterinary practitioners, students, and technicians will find this a valuable reference. The following topics are covered in this manual: fractions and decimals, scientific notation, temperature and units of volume, equations, ratios and proportions, physical chemistry, dilution and drug dosing by body surface area, IV drips, oral suspensions, eye drop calibrations, nutritional support and metabolic scaling, and toxicology and blood levels.
