BSAVA Manual of Canine and Feline Musculoskeletal Disorders. BSAVA British Small Animal Veterinary Association

Description: Building on the success of the BSAVA Manual of Small Animal Arthrology, this new Manual has broadened its remit to cover conditions of bone, tendon and muscle, to provide a ready reference for the small animal practitioner faced with a dog or cat showing lameness, stiffness or joint pain.

The early parts of the Manual deal with generic issues related to the biology, diseases and treatment of bones, joints, muscles and tendons. Arthritis is addressed in detail, with notes on the modern approach to management. Chapters on surgical principles and instrumentation, biomaterials, arthroscopy and postoperative management address the general issues encountered in joint surgery. Chapters focused on each of the major synovial joints, including the temporomandibular joint, then follow. Each of these joint-specific chapters deals with basic anatomy and surgical approaches, before describing the conditions that affect the particular joint.

Common surgical procedures on joints are described with the use of Operative Techniques. Possible pitfalls and key points are highlighted, so as to make maximum use of the experience of the international panel of authors. The Operative Techniques are illustrated with the specially commissioned colour drawings that are so much a hallmark of BSAVA Manuals.

Contents:

List of Contributors.

Foreword.

Preface.

1. An Approach to the Lame Dog or Cat (John E.F. Houlton).
2. Radiography (Jeremy V. Davies).
3. Laboratory Investigations (Susan Bell and John E.F. Houlton).
