International Trade and Agriculture. Theories and Practices

Description: An understanding of international trade is essential to the study of agricultural economics and agribusiness. International Trade and Agriculture examines the relationship between agriculture and the world of international trade; among the topics covered are trade theories and policies affecting trade flows, macroeconomics issues such as exchange rates and the balance of trade, foreign direct investment, and the impact of international trade on economic development and the environment. Each chapter features overviews and summaries, key concepts, questions and tasks for review, and suggested readings. With its international focus, agricultural perspective, and engaging pedagogy, this text offers an innovative and accessible approach to the study of agricultural trade.
