Transition Economies. Political Economy in Russia, Eastern Europe, and Central Asia

Description: Transition Economies provides students with an up-to-date and highly comprehensive analysis of the economic transformation in former communist countries of Eastern and Central Europe and countries of the former Soviet Union. With coverage extending from the end of central planning to the capitalist varieties of the present, this text provides a comparative analysis of economic transformation and political-economic diversity that has emerged as a direct result. It covers differences between countries in terms of economic performance and integration into the world economy. Transition Economies seeks to explain and deepen understanding of these differences, chart the emerging forms of capitalism there, and provide country responses to the world financial crisis of 2008–2009.

Contents:

Introduction

Part I: The political economy of state socialism

Chapter 1: The system of state socialism
