Readings in Games and Information. Wiley Blackwell Readings for Contemporary Economics

Description: This essential collection brings together influential classic and contemporary articles from a variety of sources to present the key topics in game theory. Rather than an exhaustive volume, this superb resource offers students and researchers an accessible treatment of game theory essentials. The text is interspersed with editorial commentary, newspaper articles and cartoons, recommendations for further reading, and a substantial amount of material on how to conduct research in this area.

Readings in Games and Information is an exceptional course companion, used alone or as a supplement to Rasmusen's Games and Information (third edition, Blackwell, 2001).

Contents: Preface. Acknowledgements.

Introduction.

1. The Prisoner’s Dilemma (Philip D. Straffin, Jr.).
2. A two–Person Dilemma (Albert Tucker).
3. Equilibrium Points in N–Person Games (John F. Nash Jr.).
