72nd Conference on Glass Problems. Ceramic Engineering and Science Proceedings, Volume 33, Issue 1

Description:

Sets forth innovative, viable solutions to challenging problems in glass manufacturing

Since 1934, the annual Conference on Glass Problems has addressed the challenges facing the glass industry with innovative solutions that have led to new and enhanced glass products and processes. Each year, the proceedings from this conference, which has become the largest industrial glass meeting in the United States, have been published for the benefit of glass, ceramics, and materials scientists and engineers around the world.

This volume features the state-of-the-science collection of papers presented at the 72nd Conference on Glass Problems. During the conference, leading international scientists and engineers met for two days to discuss the latest innovations and solutions for glass manufacturing. Moreover, they forecasted and explored future directions of the glass industry. The proceedings are grouped into five sections:

- Glass melting
- Legislation, safety, and emissions
- Refractories
- Recycling and batch wetting
- Process control

References at the end of each paper enable readers to explore individual topics in greater depth.

The 72nd Conference on Glass Problems is essential reading for all scientists and engineers who need to stay abreast of the latest research in the field. All readers will find valuable information that enables the glass industry to continue to innovate with new and improved glass products and processes to meet the needs of both industrial and general consumers.

Contents:

Foreword ix
Preface xi
Acknowledgments xiii

GLASS MELTING

Optimization of Burners in Oxygen–Gas Fired Glass Furnace 3
Marco van Kersbergen, Ruud Beerkens, Wladimir Sarmiento–Darkin, and Hisashi Kobayashi

Future Energy–Efficient and Low–Emissions Glass Melting Processes 15
Ruud Beerkens, Hans van Limpt, Adriaan Lankhorst, and Piet van Santen

Mathematical Modeling to Optimize a Furnace Length by Width Ratio 33
Erik Muijsenberg, Marketa Muijsenberg, Tomas Krobot, and Glenn Neff

A Summary of Almost 50 Years of Glass Furnace Preheating 53
George Kopser

Is 50% Energy Efficiency Improvement Possible in the Glass Product and Production Chain in 2030? 65
Leon Wijshoff

REFRACTORIES

Conception of Modern Glass Furnace Regenerators 75
Stefan Postrach, Elias Carillo, Mathew Wheeler, and Götz Heilemann
New Cruciform Solutions to Upgrade Your Regenerator 91
D. Lechevalier, I. Cabodi, O. Citti, M. Gaubil, and J. Poiret

Bonded Solutions for the Container Market 105
Thierry Azencot and Michele Blackburn

Low–Cost Fused Cast Refractories: Some Peculiarities and Connection with Glass Defects 113
P. Carlo Ratto

Mullite, Spinel & Calcium Aluminate  Leading the Way for Long Campaign/Energy Efficient Modern Glass Furnace Construction 121
Chris Windle, Trevor Wilson, and Rhiannon Webster

MoZr02  A New Material for Glass Melting Electrodes and Molybdenum Glass Tank Reinforcements Experiences and Insights 135
Mike Ferullo and Rudolf Holzknecht

PROCESS CONTROL

Changing of Gob Temperature from Spout to Blank 147

High Viscosity Glass Sheet Fabrication 159
Daniel Hawtof

Closed Loop Control of Blank Mold Temperatures 167
Jonathan Simon and Braden McDermott

LEGISLATION, SAFETY, AND EMISSIONS

The U.S. Policy and Political Landscape and Its Potential Impacts on the Glass Industry: Through a Glass Darkly 179
Shelley N. Fidler and Marisa Hecht

Achieving a Global Corporate Safety Culture 187
Jeff Hannis

Emission Monitoring in the Glass Industry 193
Steve Roosz

RECYCLING AND BATCH WETTING

Design of a New 25 Ton per Hour Waste Glass Processing Plant for Rumpke 205
Christian Makari and Stefan Ebner

Glass Recycling Technology of Today 217
Hoser Moser

Cord Testing using Thermal Shock: Virtue or Vice? 221
Gary L. Smay and Henry M. Dimmick, Jr.

To Wet or Not to Wet, That is the Question   Part B   Using Dry Batch 231
Douglas H. Davis and Christopher J. Hoyle

Batch Wetting  Another Point of View 243
John Brown, Hisashi Kobayashi, Wladimir Sarmiento–Darkin, and Matthias Lindig

Author Index 257

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: 72nd Conference on Glass Problems. Ceramic Engineering and Science Proceedings, Volume 33, Issue 1
Web Address: http://www.researchandmarkets.com/reports/2253278/
Office Code: SCD25IL3

Product Format
Please select the product format and quantity you require:

Quantity
Hard Copy (Hard Back): USD 96 + USD 29 Shipping/Handling

* Shipping/Handling is only charged once per order.

Contact Information
Please enter all the information below in BLOCK CAPITALS

Title: Mr □ Mrs □ Dr □ Miss □ Ms □ Prof □

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
