# MIMO Wireless Networks. Edition No. 2

**Description:** This book is unique in presenting channels, techniques and standards for the next generation of MIMO wireless networks. Through a unified framework, it emphasizes how propagation mechanisms impact the system performance under realistic power constraints. Combining a solid mathematical analysis with a physical and intuitive approach to space-time signal processing, the book progressively derives innovative designs for space-time coding and precoding as well as multi-user and multi-cell techniques, taking into consideration that MIMO channels are often far from ideal. Reflecting developments since the first edition was published, this book has been thoroughly revised, and now includes new sections and five new chapters, respectively dealing with receiver design, multi-user MIMO, multi-cell MIMO, MIMO implementation in standards, and MIMO system-level evaluation.

- Extended introduction to multi-dimensional propagation, including polarization aspects
- Detailed and comparative description of physical models and analytical representations of single- and multi-link MIMO channels, covering the latest standardized models
- Thorough overview of space-time coding techniques, covering both classical and more recent schemes under information theory and error probability perspectives
- Intuitive illustration of how real-world propagation affects the capacity and the error performance of MIMO transmission schemes
- Detailed information theoretic analysis of multiple access, broadcast and interference channels
- In-depth presentation of multi-user diversity, resource allocation and (non-)linear MU-MIMO precoding techniques with perfect and imperfect channel knowledge
- Extensive coverage of cooperative multi-cell MIMO-OFDMA networks, including network resource allocation optimization, coordinated scheduling, beamforming and power control, interference alignment, joint processing, massive and network MIMO
- Applications of MIMO and Coordinated Multi-Point (CoMP) in LTE, LTE-A and WiMAX

**Ordering:**

- Order Online - [http://www.researchandmarkets.com/reports/2485198/](http://www.researchandmarkets.com/reports/2485198/)
- Order by Fax - using the form below
- Order by Post - print the order form below and send to

  Research and Markets,  
  Guinness Centre,  
  Taylors Lane,  
  Dublin 8,  
  Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: MIMO Wireless Networks. Edition No. 2
Web Address: http://www.researchandmarkets.com/reports/2485198/
Office Code: SCT9OWNE

Product Format
Please select the product format and quantity you require:

| Quantity          | Hard Copy (Hard Back) | USD 102 + USD 28 Shipping/Handling |

* Shipping/Handling is only charged once per order.

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:

- Account number: 833 130 83
- Sort code: 98-53-30
- Swift code: ULSBIE2D
- IBAN number: IE78ULSB98533083313083
- Bank Address: Ulster Bank,
  27-35 Main Street,
  Blackrock,
  Co. Dublin,
  Ireland.
