Add weight to presentations and pitches by understanding the future growth prospects of the Spain suncare market with five year forecasts by both value and volume

Macroeconomic indicators provide insight into general trends within the Spain economy

Reasons To Buy
What was the size of the Spain suncare market by value in 2015?

What will be the size of the Spain suncare market in 2020?

What factors are affecting the strength of competition in the Spain suncare market?

How has the market performed over the last five years?

Who are the top competitors in Spain's suncare market?

Key Highlights
- The suncare market consists of the retail sale of sun protection, after-sun and self-tan products. The market is valued according to retail selling price (RSP) and includes any applicable taxes. Any currency conversions used in the creation of this report have been calculated using constant 2015 annual average exchange rates.

- The Spanish suncare market had total revenues of $266.7m in 2015, representing a compound annual growth rate (CAGR) of 0.9% between 2011 and 2015.

- Market consumption volume increased with a CAGR of 0.9% between 2011 and 2015, to reach a total of 19.3 million units in 2015.

- Spaniards have long been aware of the health issues associated with prolonged exposure to the sun and the suncare market is therefore mature. This leaves little room for growth, particularly given the country's precarious economic situation (recovery remains very slow), and this can be seen in both recent and forecast growth rates.
