Fuel Economy & CO2 Reduction News

Description: New developments in technology are taking place every day, and staying up to date is a challenge. The Ricardo collection of news bulletins provide a convenient and efficient way of staying up to date on a regular basis, delivered directly to your email inbox.

Each news bulletin records selected new material acquired and indexed by Ricardo Information Services, on a monthly basis. The Bulletins are produced in PDF format, and are supplied by email. Each title contains a summary of the papers indexed, with the opportunity to request full-text copies if required. Source material includes journal articles, SAE papers, conference proceedings, manufacturer's literature and other technical publications.

Fuel Economy & CO2 Reduction News summarizes the literature on fuel consumption issues in vehicles, powertrains, engines and transmissions or drivelines, mainly for automotive applications.

Typical content includes:

Measurement, estimation and testing
Vehicles
Components
Engines - diesel, gasoline.
Components - Aftertreatment systems - boosting systems - start stop - superchargers.
Transmissions and drivelines
Alternative powertrains
Fuels and lubricants
Thermal management, waste heat and energy recovery
