Crop Protection Chemicals Market by Type, by Crop Type, by Geography - Global Trends and Forecast To 2019

Description: Crop Protection Chemicals Market by Type (Herbicides, Fungicides, Insecticides, and Others), by Crop Type (Cereals & Grains, Oilseeds & Pulses, Fruits & Vegetables, and Others), by Geography - Global Trends and Forecast To 2019

This report segments the global crop protection chemicals market into all major regions and further, their key countries. In terms of regions, the report is segmented into North America, Europe, Asia-Pacific, Latin America, and Rest of the World (RoW). Asia-Pacific and North America are the top two consumers of crop protection chemicals, accounting together for nearly 50% of the total market share. Asia-Pacific is the fastest-growing region, in terms of revenue.

The global crop protection market is also segmented on the basis of type—herbicides, fungicides, insecticides, and others—and also by crop type—cereals & grains, oilseeds & pulses, fruits & vegetables, and others.

The crop protection chemicals market is mainly driven by the limited availability of arable land, high profitability margin, acceptance of modern farming and protected agriculture, and changes in farming practices and technology. To capitalize on the growth trend in the global crop protection market, several leading companies are investing in the development and manufacturing of crop protection chemicals. The growing demand for crop protection chemicals is compelling global players to widen their crop protection offerings.

This report also profiles leading players of this industry, along with their recent developments and other strategic activities. The players include Syngenta (Switzerland), BASF (Germany), Dow AgroSciences (U.S.), and DuPont (U.S.). Agreements, partnerships, and collaborations are the most common strategies followed by these companies, and are predicted to give a new dimension to this market from 2014 to 2019.
