Theory of Quantum and Classical Connections In Modeling Atomic, Molecular And Electrodynamical Systems

Description: Quantum and Classical Connections in Modeling Atomic, Molecular and Electrodynamical Systems is intended for scientists and graduate students interested in the foundations of quantum mechanics and applied scientists interested in accurate atomic and molecular models. This is a reference to those working in the new field of relativistic optics, in topics related to relativistic interactions between very intense laser beams and particles, and is based on 30 years of research. The novelty of this work consists of accurate connections between the properties of quantum equations and corresponding classical equations used to calculate the energetic values and the symmetry properties of atomic, molecular and electrodynamical systems, as well as offering applications using methods for calculating the symmetry properties and the energetic values of systems and the calculation of properties of high harmonics in interactions between very intense electromagnetic fields and electrons.

- Features detailed explanations of the theories of atomic and molecular systems, as well as wave properties of stationary atomic and molecular systems
- Provides periodic solutions of classical equations, semi-classical methods, and theories of systems composed of very intense electromagnetic fields and particles
- Offers models and methods based on 30 years of research

Contents: I.1. Connection between Schrödinger and Hamilton-Jacobi equations in the case of stationary atomic and molecular systems.

I.2. Connection between Klein-Gordon and relativistic Hamilton-Jacobi equations for systems composed of electromagnetic fields and particles.

Ordering: Order Online - http://www.researchandmarkets.com/reports/2559862/

Order by Fax - using the form below

Order by Post - print the order form below and send to

Research and Markets,
Guinness Centre,
Taylors Lane,
Dublin 8,
Ireland.
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct.

Product Name: Theory of Quantum and Classical Connections In Modeling Atomic, Molecular And Electrodynamical Systems
Web Address: http://www.researchandmarkets.com/reports/2559862/
Office Code: SCPL90XB

Product Format
Please select the product format and quantity you require:

<table>
<thead>
<tr>

Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:

Account number: 833 130 83
Sort code: 98-53-30
Swift code: ULSBIE2D
IBAN number: IE78ULSB98533083313083
Bank Address: Ulster Bank,
27-35 Main Street,
Blackrock,
Co. Dublin,
Ireland.
