Thermodynamics and Statistical Mechanics. An Integrated Approach

Description:
This textbook brings together the fundamentals of the macroscopic and microscopic aspects of thermal physics by presenting thermodynamics and statistical mechanics as complementary theories based on small numbers of postulates. The book is designed to give the instructor flexibility in structuring courses for advanced undergraduates and/or beginning graduate students and is written on the principle that a good text should also be a good reference.

The presentation of thermodynamics follows the logic of Clausius and Kelvin while relating the concepts involved to familiar phenomena and the modern student’s knowledge of the atomic nature of matter. Another unique aspect of the book is the treatment of the mathematics involved. The essential mathematical concepts are briefly reviewed before using them, and the similarity of the mathematics to that employed in other fields of physics is emphasized.

The text gives in-depth treatments of low-density gases, harmonic solids, magnetic and dielectric materials, phase transitions, and the concept of entropy. The microcanonical, canonical, and grand canonical ensembles of statistical mechanics are derived and used as the starting point for the analysis of fluctuations, blackbody radiation, the Maxwell distribution, Fermi–Dirac statistics, Bose–Einstein condensation, and the statistical basis of computer simulations.

Contents:
Preface xiii

Part I Elements of Thermal Physics 1
1. Fundamentals 3
1.1 PVT Systems 3
1.2 Equilibrium States 6
1.3 Processes and Heat 10
1.4 Temperature 12
1.5 Size Dependence 13
1.6 Heat Capacity and Specific Heat 14
Problems 17

2. First Law of Thermodynamics 19
2.1 Work 19
2.2 Heat 21
2.3 The First Law 21
2.4 Applications 22
Problems 26

3. Properties and Partial Derivatives 27
Problems 107

8. Temperature Scales and Absolute Zero 109
  8.1 Temperature Scales 109
  8.2 Uniform Scales and Absolute Zero 111
  8.3 Other Temperature Scales 114

Problems 115

9. State Space and Differentials 117
  9.1 Spaces 117
  9.2 Differentials 121
  9.3 Exact Versus Inexact Differentials 123
  9.4 Integrating Differentials 127
  9.5 Differentials in Thermodynamics 129
  9.6 Discussion and Summary 134

Problems 136

10. Entropy 139
  10.1 Definition of Entropy 139
  10.2 Clausius Theorem 142
  10.3 Entropy Principle 145
  10.4 Entropy and Irreversibility 148
  10.5 Useful Energy 151
  10.6 The Third Law 155
  10.7 Unattainability of Absolute Zero 156

Problems 158

Appendix 10.A. Entropy Statement of the Second Law 158

11. Consequences of Existence of Entropy 165
  11.1 Differentials of Entropy and Energy 165
  11.2 Ideal Gases 167
  11.3 Relationships Between CV, CP, BT , BS, and V 170
  11.4 Clapeyron’s Equation 172
  11.5 Maximum Entropy, Equilibrium, and Stability 174
  11.6 Mixing 178
Appendix 23.A. Classical Approximation 410

Part V Statistical Mechanics II 415

24. Photons and Phonons 417

24.1 Plane Wave Eigenstates 417

24.2 Photons 421

24.3 Harmonic Approximation 425

24.4 Phonons 429

Problems 434

25. Grand Canonical Ensemble 435

25.1 Thermodynamics of Open Systems 435

25.2 Grand Canonical Ensemble 437

25.3 Properties and Fluctuations 438

25.4 Ideal Gases 441

Problems 443

26. Fermions and Bosons 445

26.1 Identical Particles 445

26.2 Exchange Symmetry 447

26.3 Fermi–Dirac and Bose–Einstein Statistics 452

Problems 456

Appendix 26.A. Fermions in the Canonical Ensemble 457

27. Fermi and Bose Gases 461

27.1 Ideal Gases 461

27.2 Fermi Gases 465

27.3 Low Temperature Heat Capacity 466

27.4 Bose Gases 469

Problems 472

28. Interacting Systems 475

28.1 Ising Model 475

28.2 Nonideal Gases 481

Problems 487

29. Computer Simulations 489
Fax Order Form
To place an order via fax simply print this form, fill in the information below and fax the completed form to 646-607-1907 (from USA) or +353-1-481-1716 (from Rest of World). If you have any questions please visit http://www.researchandmarkets.com/contact/

Order Information
Please verify that the product information is correct and select the format(s) you require.

- **Product Name:** Thermodynamics and Statistical Mechanics. An Integrated Approach
- **Web Address:** [http://www.researchandmarkets.com/reports/2616959/](http://www.researchandmarkets.com/reports/2616959/)
- **Office Code:** SCBR2HH5

Product Formats
Please select the product formats and quantity you require:

- **Hard Copy (Paper back):** USD 99 + USD 29 Shipping/Handling
- **Hard Copy (Hard Back):** USD 146 + USD 29 Shipping/Handling

* Shipping/Handling is only charged once per order.

Contact Information
Please enter all the information below in **BLOCK CAPITALS**

- **Title:** Mr [ ] Mrs [ ] Dr [ ] Miss [ ] Ms [ ] Prof [ ]
- **First Name:** ____________________________ **Last Name:** ____________________________
- **Email Address:** *
- **Job Title:** ____________________________
- **Organisation:** ____________________________
- **Address:** ____________________________
- **City:** ____________________________
- **Postal / Zip Code:** ____________________________
- **Country:** ____________________________
- **Phone Number:** ____________________________
- **Fax Number:** ____________________________

* Please refrain from using free email accounts when ordering (e.g. Yahoo, Hotmail, AOL)
Payment Information

Please indicate the payment method you would like to use by selecting the appropriate box.

☐ Pay by credit card: You will receive an email with a link to a secure webpage to enter your credit card details.

☐ Pay by check: Please post the check, accompanied by this form, to:
Research and Markets,
Guinness Center,
Taylors Lane,
Dublin 8,
Ireland.

☐ Pay by wire transfer: Please transfer funds to:
Account number
Sort code
Swift code
IBAN number
Bank Address
833 130 83
98-53-30
