Interior Spaces

Description: Space, light and material: from the meditative ambiance of a chapel or synagogue to the colourful, organic forms of fashion boutiques, the design of an interior space - composed of lighting, the surfaces, textures and colours of materials, finishing and features - creates atmosphere and lends specific character.

The growing willingness on the part of designers in recent years to experiment with colours, materials and spatial concepts is demonstrated in the range and diversity of international examples presented in this, the third volume in the series "In Detail".

All plans and drawings of interiors and furnishings have been carefully researched and drawn by the staff of DETAIL. Three introductory essays by expert authors are followed by 28 exemplary case-studies by such names as Alvaro Siza, Future Systems, Dominique Perrault, and Herzog & de Meuron.
